**Background :** enzyme regulation: Inhibited by formycin B., function: Sodium-dependent and purine-selective transporter. Exhibits the transport characteristics of the nucleoside transport system cif or N1 subtype (N1/cif) (selective for purine nucleosides and uridine). Plays a critical role in specific uptake and salvage of purine nucleosides in kidney and other tissues., similarity: Belongs to the concentrative nucleoside transporter (CNT) (TC 2.A.41) family., tissue specificity: Expressed in heart and skeletal muscle followed by liver, kidney, intestine, pancreas, placenta and brain. Weak expression in lung.,
