

E4BP4 Polyclonal Antibody

Catalog No :	YT1447
Reactivity :	Human;Mouse;Rat
Applications :	WB;IF;ELISA
Target :	E4BP4
Gene Name :	NFIL3
Protein Name :	Nuclear factor interleukin-3-regulated protein
Human Gene Id :	4783
Human Swiss Prot No :	Q16649
Mouse Gene Id :	18030
Mouse Swiss Prot No :	O08750
Rat Gene Id :	114519
Rat Swiss Prot No :	Q6IMZ0
Immunogen :	The antiserum was produced against synthesized peptide derived from human NFIL3. AA range:61-110
Specificity :	E4BP4 Polyclonal Antibody detects endogenous levels of E4BP4 protein.
Formulation :	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source :	Polyclonal, Rabbit,IgG
Dilution :	WB 1:500 - 1:2000. IF 1:200 - 1:1000. ELISA: 1:20000. Not yet tested in other applications.
Purification :	The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.

Concentration :	1 mg/ml
Storage Stability :	-15°C to -25°C/1 year(Do not lower than -25°C)
Observed Band :	51kD
Background :	The protein encoded by this gene is a transcriptional regulator that binds as a homodimer to activating transcription factor (ATF) sites in many cellular and viral promoters. The encoded protein represses PER1 and PER2 expression and therefore plays a role in the regulation of circadian rhythm. Three transcript variants encoding the same protein have been found for this gene. [provided by RefSeq, Feb 2014],
Function :	function:Acts as a transcriptional regulator that recognizes and binds to the sequence 5'-[GA]TTA[CT]GTAA[CT]-3', a sequence present in many cellular and viral promoters. Represses transcription from promoters with activating transcription factor (ATF) sites. Represses promoter activity in osteoblasts (By similarity). Represses transcriptional activity of PER1 (By similarity). Represses transcriptional activity of PER2 via the B-site on the promoter (By similarity). Activates transcription from the interleukin-3 promoter in T-cells. Competes for the same consensus-binding site with PAR DNA-binding factors (DBP, HLF and TEF) (By similarity). Component of the circadian clock that acts as a negative regulator for the circadian expression of PER2 oscillation in the cell-autonomous core clock (By similarity). Protects pro-B cells from programmed cell death.,induction:Up-regulated by PHA or TP
Subcellular Location :	Nucleus .
Expression :	Expressed in bladder stomach, thyroid, spinal cord, lymph node, trachea, adrenal gland, bone marrow and muscle.
Sort :	5360
No4 :	1
Host :	Rabbit
Modifications :	Unmodified
