

GluR- δ 2 Polyclonal Antibody

Catalog No :	YT1927
Reactivity :	Human;Mouse;Rat
Applications :	WB;IF;ELISA
Target :	GRID2
Fields :	>>Neuroactive ligand-receptor interaction;>>Long-term depression
Gene Name :	GRID2
Protein Name :	Glutamate receptor delta-2 subunit
Human Gene Id :	2895
Human Swiss Prot No :	O43424
Mouse Gene Id :	14804
Mouse Swiss Prot No :	Q61625
Rat Gene Id :	79220
Rat Swiss Prot No :	Q63226
Immunogen :	The antiserum was produced against synthesized peptide derived from human GRID2. AA range:831-880
Specificity :	GluR- δ 2 Polyclonal Antibody detects endogenous levels of GluR- δ 2 protein.
Formulation :	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source :	Polyclonal, Rabbit,IgG
Dilution :	WB 1:500 - 1:2000. IF 1:200 - 1:1000. ELISA: 1:20000. Not yet tested in other applications.

Purification :	The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.
Concentration :	1 mg/ml
Storage Stability :	-15°C to -25°C/1 year(Do not lower than -25°C)
Observed Band :	113kD
Cell Pathway :	Neuroactive ligand-receptor interaction;Long-term depression;
Background :	<p>The protein encoded by this gene is a member of the family of ionotropic glutamate receptors which are the predominant excitatory neurotransmitter receptors in the mammalian brain. The encoded protein is a multi-pass membrane protein that is expressed selectively in cerebellar Purkinje cells. A point mutation in the mouse ortholog, associated with the phenotype named 'lurcher', in the heterozygous state leads to ataxia resulting from selective, cell-autonomous apoptosis of cerebellar Purkinje cells during postnatal development. Mice homozygous for this mutation die shortly after birth from massive loss of mid- and hindbrain neurons during late embryogenesis. This protein also plays a role in synapse organization between parallel fibers and Purkinje cells. Alternate splicing results in multiple transcript variants encoding distinct isoforms. Mutations in this</p>
Function :	<p>domain:The PDZ-binding motif mediates interaction with GOPC.,function:Receptor for glutamate. L-glutamate acts as an excitatory neurotransmitter at many synapses in the central nervous system. The postsynaptic actions of Glu are mediated by a variety of receptors that are named according to their selective agonists.,similarity:Belongs to the glutamate-gated ion channel (TC 1.A.10) family.,subunit:Interacts with AIP1, AP4M1, BECN1, GOPC, GRID2IP, SHANK1 and SHANK2.,</p>
Subcellular Location :	Cell membrane ; Multi-pass membrane protein . Cell junction, synapse, postsynaptic cell membrane ; Multi-pass membrane protein .
Expression :	Brain,Cerebellum,PCR rescued clones,
Sort :	6634
No4 :	1
Host :	Rabbit
Modifications :	Unmodified
