

IL-10Ra Polyclonal Antibody

Catalog No: YT2308

Reactivity: Human; Mouse

Applications: WB;IF;ELISA

Target: IL-10Ra

Fields: >>Cytokine-cytokine receptor interaction;>>Viral protein interaction with

cytokine and cytokine receptor;>>JAK-STAT signaling

pathway;>>Toxoplasmosis;>>Tuberculosis;>>Human cytomegalovirus infection

Gene Name: IL10RA

Protein Name: Interleukin-10 receptor subunit alpha

Q13651

Q61727

Human Gene Id: 3587

Human Swiss Prot

No:

Mouse Swiss Prot

No:

Immunogen: The antiserum was produced against synthesized peptide derived from human

IL-10R alpha. AA range:462-511

Specificity: IL-10Ra Polyclonal Antibody detects endogenous levels of IL-10Ra protein.

Formulation : Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Source: Polyclonal, Rabbit, IgG

Dilution: WB 1:500 - 1:2000. IF 1:200 - 1:1000. ELISA: 1:10000. Not yet tested in other

applications.

Purification: The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

Concentration: 1 mg/ml

1/3

Storage Stability: -15°C to -25°C/1 year(Do not lower than -25°C)

Observed Band: 63kD

Cell Pathway : Cytokine-cytokine receptor interaction; Jak_STAT;

Background: The protein encoded by this gene is a receptor for interleukin 10. This protein is

structurally related to interferon receptors. It has been shown to mediate the immunosuppressive signal of interleukin 10, and thus inhibits the synthesis of proinflammatory cytokines. This receptor is reported to promote survival of progenitor myeloid cells through the insulin receptor substrate-2/PI 3-kinase/AKT pathway. Activation of this receptor leads to tyrosine phosphorylation of JAK1 and TYK2 kinases. Two transcript variants, one protein-coding and the other not protein-coding, have been found for this gene. [provided by RefSeg, Jan 2009],

Function: function:Receptor for IL10; binds IL10 with a high affinity.,similarity:Belongs to

the type II cytokine receptor family., tissue specificity: Spleen, thymus, and PBMC.

Weak expression in pancreas, skeletal muscle, brain, heart, and kidney.

Placenta, lung, and liver showed intermediate levels. Monocytes, B-cells, large

granular lymphocytes, and T-cells express high levels.,

Subcellular Location:

Cell membrane; Single-pass type I membrane protein. Cytoplasm.

Expression: Primarily expressed in hematopoetic cells including B-cells, T-cells, NK cells,

monocytes and macrophages. Not expressed in non-hematopoetic cells such as

fibroblasts or endothelial cells.

Tag: orthogonal

Sort : 8417

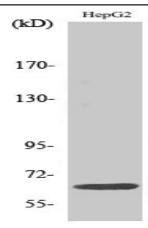

No4: 1

Host: Rabbit

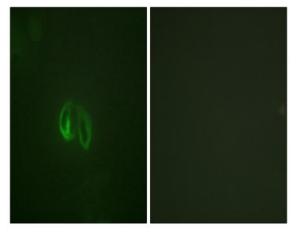

Modifications: Unmodified
