

## KVβ.3 Polyclonal Antibody

Catalog No: YT2517

**Reactivity:** Human; Mouse; Rat

**Applications:** WB;IHC;IF;ELISA

Target: KVβ.3

Gene Name: KCNAB3

**Protein Name:** Voltage-gated potassium channel subunit beta-3

O43448

P97382

Human Gene Id: 9196

**Human Swiss Prot** 

No:

**Mouse Swiss Prot** 

No:

Rat Gene Id: 58981

Rat Swiss Prot No: Q63494

**Immunogen:** The antiserum was produced against synthesized peptide derived from human

KCNAB3. AA range:293-342

**Specificity:** KVβ.3 Polyclonal Antibody detects endogenous levels of KVβ.3 protein.

**Formulation :** Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Source: Polyclonal, Rabbit, IgG

**Dilution:** WB 1:500 - 1:2000. IHC 1:100 - 1:300. ELISA: 1:10000.. IF 1:50-200

**Purification:** The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

Concentration: 1 mg/ml

1/3

**Storage Stability:** -15°C to -25°C/1 year(Do not lower than -25°C)

Observed Band: 45kD

Background: This gene encodes a member of the potassium channel, voltage-gated, shaker-

related subfamily. The encoded protein is one of the beta subunits, which are auxiliary proteins associating with functional Kv-alpha subunits. The encoded protein forms a heterodimer with the potassium voltage-gated channel, shaker-related subfamily, member 5 gene product and regulates the activity of the alpha

subunit. [provided by RefSeq, May 2012],

Function: domain:Alteration of functional properties of alpha subunit is mediated through N-

terminal domain of beta subunit.,function:Accessory potassium channel protein which modulates the activity of the pore-forming alpha subunit. Alters the

functional properties of Kv1.5., similarity: Belongs to the shaker potassium channel

beta subunit family.,subunit:Forms heteromultimeric complex with alpha subunits.,tissue specificity:Brain specific. Most prominent expression in cerebellum. Weaker signals detected in cortex, occipital lobe, frontal lobe and

temporal lobe. Not detected in spinal cord, heart, lung, liver, kidney, pancreas,

placenta and skeletal muscle.,

Cytoplasm.

Subcellular

Location:

**Expression :** Brain specific. Most prominent expression in cerebellum. Wea

Brain specific. Most prominent expression in cerebellum. Weaker signals detected in cortex, occipital lobe, frontal lobe and temporal lobe. Not detected in

spinal cord, heart, lung, liver, kidney, pancreas, placenta and skeletal muscle.

**Sort**: 9072

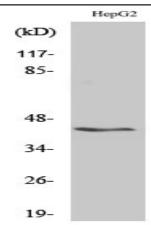

No4: 1

Host: Rabbit

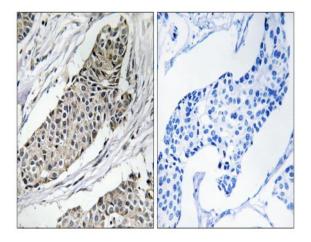

Modifications: Unmodified
