

## M-cadherin Polyclonal Antibody

YT2677 Catalog No:

Human; Mouse; Rat Reactivity:

**Applications:** WB;IHC;IF;ELISA

M-cadherin **Target:** 

Fields: >>Cell adhesion molecules

Gene Name: CDH15

**Protein Name:** Cadherin-15

**Human Gene Id:** 1013

**Human Swiss Prot** 

No:

Mouse Gene Id: 12555

**Mouse Swiss Prot** 

No:

The antiserum was produced against synthesized peptide derived from human Immunogen:

CDH15. AA range:81-130

**Specificity:** M-cadherin Polyclonal Antibody detects endogenous levels of M-cadherin

protein.

P55291

P33146

Formulation: Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Polyclonal, Rabbit, IgG Source:

WB 1:500 - 1:2000. IHC 1:100 - 1:300. ELISA: 1:10000.. IF 1:50-200 **Dilution:** 

The antibody was affinity-purified from rabbit antiserum by affinity-**Purification:** 

chromatography using epitope-specific immunogen.

Concentration: 1 mg/ml

1/3

Storage Stability: -15°C to -25°C/1 year(Do not lower than -25°C)

Observed Band: 89kD

**Cell Pathway:** Cell adhesion molecules (CAMs);

**Background:** This gene is a member of the cadherin superfamily of genes, encoding calcium-

dependent intercellular adhesion glycoproteins. Cadherins consist of an extracellular domain containing 5 cadherin domains, a transmembrane region, and a conserved cytoplasmic domain. Transcripts from this particular cadherin are expressed in myoblasts and upregulated in myotubule-forming cells. The protein is thought to be essential for the control of morphogenetic processes, specifically myogenesis, and may provide a trigger for terminal muscle cell

differentiation. [provided by RefSeq, Jul 2008],

Function: disease: A chromosomal aberration involving CDH15 and KIRREL3 is found in a

patient with severe mental retardation and dysmorphic facial features.

Translocation t(11;16)(q24.2;q24).,disease:Defects in CDH15 are the cause of mental retardation autosomal dominant type 3 (MRD3) [MIM:612580]. Mental retardation is characterized by significantly sub-average general intellectual functioning associated with impairments in adaptative behavior and manifested during the developmental period.,function:Cadherins are calcium dependent cell adhesion proteins. They preferentially interact with themselves in a homophilic manner in connecting cells; cadherins may thus contribute to the sorting of heterogeneous cell types. M-cadherin is part of the myogenic program and may provide a trigger for terminal muscle differentiation.,similarity:Contains 5 cadherin

domains.,tissue specificity:Expressed in the brai

Subcellular Location :

Cell membrane; Single-pass type I membrane protein.

**Expression :** Expressed in the brain and cerebellum.

Tag: hot

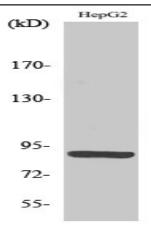

**Sort**: 9443

**No4**: 1

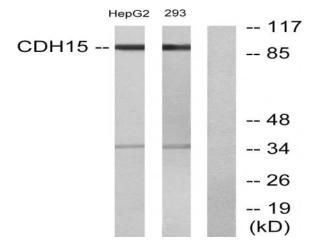

Host: Rabbit

Modifications: Unmodified

## **Products Images**

Western Blot analysis of various cells using M-cadherin Polyclonal Antibody diluted at 1:500

Western blot analysis of lysates from HepG2 and 293 cells, using CDH15 Antibody. The lane on the right is blocked with the synthesized peptide.
