

mGluR-4 Polyclonal Antibody

Catalog No: YT2744

Reactivity: Human; Mouse; Rat

Applications: WB;IHC;IF;ELISA

Target: mGluR-4

Fields: >>Phospholipase D signaling pathway;>>Neuroactive ligand-receptor

interaction;>>Glutamatergic synapse;>>Taste transduction

Gene Name: GRM4

Protein Name: Metabotropic glutamate receptor 4

Q14833

Q68EF4

Human Gene Id: 2914

Human Swiss Prot

No:

Mouse Gene Id: 268934

Mouse Swiss Prot

No:

Rat Gene Id: 24417

Rat Swiss Prot No: P31423

Immunogen : The antiserum was produced against synthesized peptide derived from human

mGluR4. AA range:851-900

Specificity: mGluR-4 Polyclonal Antibody detects endogenous levels of mGluR-4 protein.

Formulation : Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Source: Polyclonal, Rabbit, IgG

Dilution : WB 1:500 - 1:2000. IHC 1:100 - 1:300. ELISA: 1:10000.. IF 1:50-200

1/4

Purification: The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

Concentration: 1 mg/ml

Storage Stability: -15°C to -25°C/1 year(Do not lower than -25°C)

Observed Band: 100kD

Cell Pathway: Neuroactive ligand-receptor interaction; Taste transduction;

Background: glutamate metabotropic receptor 4(GRM4) Homo sapiens L-glutamate is the

major excitatory neurotransmitter in the central nervous system and activates both ionotropic and metabotropic glutamate receptors. Glutamatergic

neurotransmission is involved in most aspects of normal brain function and can be perturbed in many neuropathologic conditions. The metabotropic glutamate

receptors are a family of G protein-coupled receptors, that have been divided into

3 groups on the basis of sequence homology, putative signal transduction

mechanisms, and pharmacologic properties. Group I includes GRM1 and GRM5 and these receptors have been shown to activate phospholipase C. Group II includes GRM2 and GRM3 while Group III includes GRM4, GRM6, GRM7 and GRM8. Group II and III receptors are linked to the inhibition of the cyclic AMP cascade but differ in their agonist selectivities. Several transcript variants

encoding different isoforms have been found for this

Function: function: Receptor for glutamate. The activity of this receptor is mediated by a G-

protein that inhibits adenylate cyclase activity.,similarity:Belongs to the G-protein coupled receptor 3 family.,subunit:Interacts with PICK1.,tissue specificity:Strongly

expressed in the cerebellum. Expressed at low levels in hippocampus,

hypothalamus and thalamus. No expression detected in liver.,

Subcellular

Location :

Cell membrane; Multi-pass membrane protein.

Expression: Strongly expressed in the cerebellum. Expressed at low levels in hippocampus,

hypothalamus and thalamus. No expression detected in liver.

Tag: orthogonal

Sort: 9616

No4: 1

Host: Rabbit

Modifications: Unmodified
