

Olfactory receptor 10J5 Polyclonal Antibody

Catalog No :	YT3260
Reactivity :	Human;Rat;Mouse;
Applications :	IF;ELISA
Target :	Olfactory receptor 10J5
Gene Name :	OR10J5
Protein Name :	Olfactory receptor 10J5
Human Gene Id :	127385
Human Swiss Prot No :	Q6IFH2
Immunogen :	The antiserum was produced against synthesized peptide derived from human OR10J5. AA range:220-269
Specificity :	Olfactory receptor 10J5 Polyclonal Antibody detects endogenous levels of Olfactory receptor 10J5 protein.
Formulation :	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source :	Polyclonal, Rabbit,IgG
Dilution :	IF 1:200 - 1:1000. ELISA: 1:40000. Not yet tested in other applications.
Purification :	The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.
Concentration :	1 mg/ml
Storage Stability :	-15°C to -25°C/1 year(Do not lower than -25°C)
Molecularweight :	34kD
Cell Pathway :	Olfactory transduction;

Background :	Olfactory receptors interact with odorant molecules in the nose, to initiate a neuronal response that triggers the perception of a smell. The olfactory receptor proteins are members of a large family of G-protein-coupled receptors (GPCR) arising from single coding-exon genes. Olfactory receptors share a 7-transmembrane domain structure with many neurotransmitter and hormone receptors and are responsible for the recognition and G protein-mediated transduction of odorant signals. The olfactory receptor gene family is the largest in the genome. The nomenclature assigned to the olfactory receptor genes and proteins for this organism is independent of other organisms.
Function :	cell surface receptor linked signal transduction, G-protein coupled receptor protein signaling pathway, sensory perception, sensory perception of chemical stimulus, sensory perception of smell, neurological system process,cognition,
Sort :	11090
No4 :	1
Host :	Rabbit
Modifications :	Unmodified
