

Neurophysin I Polyclonal Antibody

Catalog No: YT3072

Reactivity: Human;Rat

Applications: WB;IHC;IF;ELISA

Target: Neurophysin I

Fields: >>cAMP signaling pathway;>>Neuroactive ligand-receptor

interaction;>>Oxytocin signaling pathway

Gene Name: OXT

Protein Name: Oxytocin-neurophysin 1

P01178

P35454

Human Gene Id: 5020

Human Swiss Prot

No:

Mouse Swiss Prot

No:

Rat Gene ld: 25504

Rat Swiss Prot No: P01179

Immunogen: The antiserum was produced against synthesized peptide derived from human

Neurophysin I. AA range:40-89

Specificity: Neurophysin I Polyclonal Antibody detects endogenous levels of Neurophysin I

protein.

Formulation : Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Source: Polyclonal, Rabbit, lgG

Dilution: WB 1:500 - 1:2000. IHC 1:100 - 1:300. ELISA: 1:20000.. IF 1:50-200

Purification: The antibody was affinity-purified from rabbit antiserum by affinity-

1/3

Host:

Modifications:

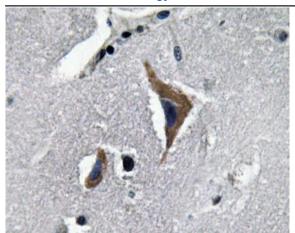

Rabbit

This gene encodes a precursor protein that is processed to produce oxytocin and neurophysin I. Oxytocin is a posterior pituitary hormone which is synthesized as an inactive precursor in the hypothalamus along with its carrier protein neurophysin I. Together with neurophysin, it is packaged into neurosecretory vesicles and transported axonally to the nerve endings in the neurohypophysis, where it is either stored or secreted into the bloodstream. The precursor seems to be activated while it is being transported along the axon to the posterior pituitary. This hormone contracts smooth muscle during parturition and lactation. It is also involved in cognition, tolerance, adaptation and complex sexual and maternal behaviour, as well as in the regulation of water excretion and cardiovascular functions. [provided by RefSeq, Dec 2013],	
function:Neurophysin 1 specifically binds oxytocin.,function:Oxytocin causes contraction of the smooth muscle of the uterus and of the mammary gland.,online information:Oxytocin entry,pharmaceutical:Oxytocin is available under the names Pitocin (Parke-Davis) and Syntocinon (Sandoz). Used to artificially speed or induce labor.,similarity:Belongs to the vasopressin/oxytocin family.,
