

PHKG1 Polyclonal Antibody

Catalog No :	YT3702
Reactivity :	Human;Rat;Mouse;
Applications :	WB;IHC
Target :	PHKG1
Fields :	>>Calcium signaling pathway;>>Insulin signaling pathway;>>Glucagon signaling pathway
Gene Name :	PHKG1
Protein Name :	Phosphorylase b kinase gamma catalytic chain skeletal muscle isoform
Human Gene Id :	5260
Human Swiss Prot No :	Q16816
Mouse Swiss Prot No :	P07934
Immunogen :	The antiserum was produced against synthesized peptide derived from human PHKG1. AA range:241-290
Specificity :	PHKG1 Polyclonal Antibody detects endogenous levels of PHKG1 protein.
Formulation :	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source :	Polyclonal, Rabbit,IgG
Dilution :	WB 1:500-2000;IHC 1:50-300
Purification :	The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.
Concentration :	1 mg/ml
Storage Stability :	-15°C to -25°C/1 year(Do not lower than -25°C)

Observed Band :	45kD
Cell Pathway :	Calcium;Insulin_Receptor;
Background :	<p>This gene is a member of the Ser/Thr protein kinase family and encodes a protein with one protein kinase domain and two calmodulin-binding domains. This protein is the catalytic member of a 16 subunit protein kinase complex which contains equimolar ratios of 4 subunit types. The complex is a crucial glycogenolytic regulatory enzyme. This gene has two pseudogenes at chromosome 7q11.21 and one at chromosome 11p11.12. Multiple transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, May 2012],</p>
Function :	<p>catalytic activity:2 ATP + phosphorylase b = 2 ADP + phosphorylase a.,domain:The two calmodulin-binding domains appear to act in concert to bind a single molecule of calmodulin and are pseudosubstrate/autoinhibitory domains.,function:Phosphorylase b kinase catalyzes the phosphorylation of serine in certain substrates, including troponin I.,similarity:Belongs to the protein kinase superfamily.,similarity:Belongs to the protein kinase superfamily. CAMK Ser/Thr protein kinase family.,similarity:Contains 1 protein kinase domain.,subunit:Polymer of 16 chains, four each of alpha, beta, gamma, and delta. Alpha and beta are regulatory chains, gamma is the catalytic chain, and delta is calmodulin.,</p>
Subcellular Location :	cytosol,phosphorylase kinase complex,
Expression :	PCR rescued clones,Salivary gland,Skeletal muscle,
Sort :	11894
No4 :	1
Host :	Rabbit
Modifications :	Unmodified
