

Ribosomal Protein L39 Polyclonal Antibody

Catalog No :	YT4113
Reactivity :	Human;Mouse;Rat
Applications :	WB;IHC;IF;ELISA
Target :	Ribosomal Protein L39
Fields :	>>Ribosome;>>Coronavirus disease - COVID-19
Gene Name :	RPL39
Protein Name :	60S ribosomal protein L39
Human Gene Id :	6170
Human Swiss Prot No :	P62891
Mouse Gene Id :	67248
Mouse Swiss Prot No :	P62892
Rat Gene Id :	1.00362e+008
Rat Swiss Prot No :	P62893
Immunogen :	The antiserum was produced against synthesized peptide derived from human RPL39. AA range:1-50
Specificity :	Ribosomal Protein L39 Polyclonal Antibody detects endogenous levels of Ribosomal Protein L39 protein.
Formulation :	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source :	Polyclonal, Rabbit,IgG
Dilution :	WB 1:500 - 1:2000. IHC 1:100 - 1:300. IF 1:200 - 1:1000. ELISA: 1:40000. Not yet tested in other applications.

Purification :	The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.
Concentration :	1 mg/ml
Storage Stability :	-15°C to -25°C/1 year(Do not lower than -25°C)
Observed Band :	6kD
Cell Pathway :	Ribosome;
Background :	Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This gene encodes a ribosomal protein that is a component of the 60S subunit. The protein belongs to the S39E family of ribosomal proteins. It is located in the cytoplasm. In rat, the protein is the smallest, and one of the most basic, proteins of the ribosome. This gene is co-transcribed with the U69 small nucleolar RNA gene, which is located in its second intron. As is typical for genes encoding ribosomal proteins, there are multiple processed pseudogenes of this gene dispersed through the genome. [provided by RefSeq, Jul 2008],
Function :	miscellaneous:This protein is the smallest and one of the most basic of the proteins in liver ribosomes.,similarity:Belongs to the ribosomal protein L39e family.,
Subcellular Location :	extracellular space,cytosol,cytosolic large ribosomal subunit,
Expression :	Colon,Eye,Heart,
Sort :	14481
No4 :	1
Host :	Rabbit
Modifications :	Unmodified

Products Images

Western Blot analysis of various cells using Ribosomal Protein L39 Polyclonal Antibody

Immunohistochemical analysis of paraffin-embedded Human brain. Antibody was diluted at 1:100(4° overnight). High-pressure and temperature Tris-EDTA,pH8.0 was used for antigen retrieval. Negative control (right) obtained from antibody was pre-absorbed by immunogen peptide.

Immunofluorescence analysis of A549 cells, using RPL39 Antibody. The picture on the right is blocked with the synthesized peptide.

Western blot analysis of lysates from COLO and HepG2 cells, using RPL39 Antibody. The lane on the right is blocked with the synthesized peptide.
