

SP-A Polyclonal Antibody

Catalog No: YT5191

Reactivity: Human; Mouse; Rat

Applications: WB;IHC;IF;ELISA

Target: SP-A

Fields: >>Phagosome;>>Pertussis

Gene Name: SFTPA2/SFTPA1

Protein Name: Pulmonary surfactant-associated protein A2/Pulmonary surfactant-associated

protein A1

Human Gene Id: 729238

Human Swiss Prot Q8IWL1

No:

Rat Gene ld: 24773

Rat Swiss Prot No: P08427

Immunogen: The antiserum was produced against synthesized peptide derived from the

Internal region of human SFTPA1/2. AA range:141-190

Specificity: SP-A Polyclonal Antibody detects endogenous levels of SP-A protein.

Formulation : Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Source: Polyclonal, Rabbit, IgG

Dilution: WB 1:500 - 1:2000. IHC: 1:100-300 ELISA: 1:20000.. IF 1:50-200

Purification: The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

Concentration: 1 mg/ml

1/3

Storage Stability: -15°C to -25°C/1 year(Do not lower than -25°C)

Observed Band: 34kD

Background: This gene is one of several genes encoding pulmonary-surfactant associated

proteins (SFTPA) located on chromosome 10. Mutations in this gene and a highly similar gene located nearby, which affect the highly conserved carbohydrate recognition domain, are associated with idiopathic pulmonary fibrosis. The current version of the assembly displays only a single centromeric SFTPA gene pair rather than the two gene pairs shown in the previous assembly which were thought to have resulted from a duplication [provided by PofSeq. Sep. 2009]

thought to have resulted from a duplication. [provided by RefSeq, Sep 2009],

Function: function:In presence of calcium ions, it binds to surfactant phospholipids and

contributes to lower the surface tension at the air-liquid interface in the alveoli of

the mammalian lung and is essential for normal

respiration.,miscellaneous:Pulmonary surfactant consists of 90% lipid and 10% protein. There are 4 surfactant-associated proteins: 2 collagenous, carbohydrate-binding glycoproteins (SP-A and SP-D) and 2 small hydrophobic proteins (SP-B and SP-C).,polymorphism:At least 6 alleles of SFTPA2 are known: 1A, 1A(0),

1A(1), 1A(2), 1A(3) and 1A(4). The sequence shown is that of allele

1A(0).,similarity:Belongs to the SFTPA family.,similarity:Contains 1 C-type lectin domain.,similarity:Contains 1 collagen-like domain.,subunit:Oligomeric complex of

6 set of homotrimers.,

Subcellular

Location:

Secreted . Secreted, extracellular space, extracellular matrix. Secreted,

extracellular space, surface film.

Tag: hot

Sort: 16534

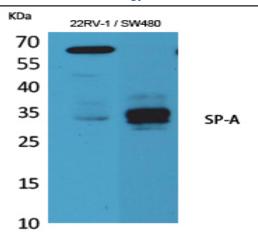

No4: 1

Host: Rabbit

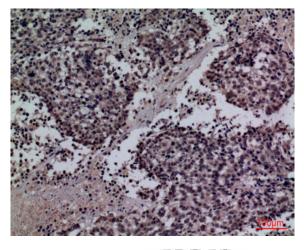

Modifications: Unmodified
