

ZNRF2 Polyclonal Antibody

Catalog No: YT4986

Reactivity: Human; Mouse

Applications: IHC;IF;ELISA

Target: ZNRF2

Gene Name: ZNRF2

Protein Name: E3 ubiquitin-protein ligase ZNRF2

Q8NHG8

Q71FD5

Human Gene Id: 223082

Human Swiss Prot

No:

Mouse Gene Id: 387524

Mouse Swiss Prot

No:

Immunogen: The antiserum was produced against synthesized peptide derived from human

ZNRF2. AA range:161-210

Specificity: ZNRF2 Polyclonal Antibody detects endogenous levels of ZNRF2 protein.

Formulation : Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Source: Polyclonal, Rabbit, IgG

Dilution: IHC 1:100 - 1:300. IF 1:200 - 1:1000. ELISA: 1:20000. Not yet tested in other

applications.

Purification: The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

Concentration: 1 mg/ml

Storage Stability: -15°C to -25°C/1 year(Do not lower than -25°C)

1/3

Molecularweight: 24kD

Background: domain: The RING-type zinc finger domain is required for E3 ligase

activity.,function:May play a role in the establisment and maintenance of neuronal transmission and plasticity via its ubiquitin ligase activity. E3 ubiquitin ligases accept ubiquitin from an E2 ubiquitin-conjugating enzyme in the form of a thioester and then directly transfer the ubiquitin to targeted

substrates., pathway: Protein modification; protein

ubiquitination.,PTM:Phosphorylated upon DNA damage, probably by ATM or ATR.,similarity:Contains 1 RING-type zinc finger.,subcellular location:Present in presynaptic plasma membranes in neurons.,subunit:Interacts with UBE2N.,tissue

specificity: Highly expressed in the brain, with higher expression during

development than in adult. Expressed also in mammary glands, testis, colon and

kidney.,

Function: domain: The RING-type zinc finger domain is required for E3 ligase

activity.,function:May play a role in the establisment and maintenance of neuronal transmission and plasticity via its ubiquitin ligase activity. E3 ubiquitin ligases accept ubiquitin from an E2 ubiquitin-conjugating enzyme in the form of a

thioester and then directly transfer the ubiquitin to targeted

specificity: Highly expressed in the brain, with higher expression during

development than in adult. Expressed also in mammary glands, testis, colon and

kidney.,

Subcellular Location:

Endosome membrane ; Peripheral membrane protein . Lysosome membrane ; Peripheral membrane protein . Cell junction, synapse, presynaptic cell membrane

; Peripheral membrane protein .

Expression: Highly expressed in the brain, with higher expression during development than in

adult. Expressed also in mammary glands, testis, colon and kidney.

Sort: 24764

No4:

Host: Rabbit

Modifications: Unmodified

Products Images

Immunofluorescence analysis of A549 cells, using ZNRF2 Antibody. The picture on the right is blocked with the synthesized peptide.

Immunohistochemical analysis of paraffin-embedded human Squamous cell carcinoma of lung. 1, Antibody was diluted at 1:200(4° overnight). 2, Tris-EDTA,pH9.0 was used for antigen retrieval. 3,Secondary antibody was diluted at 1:200(room temperature, 45min).
