

CD201 Polyclonal Antibody

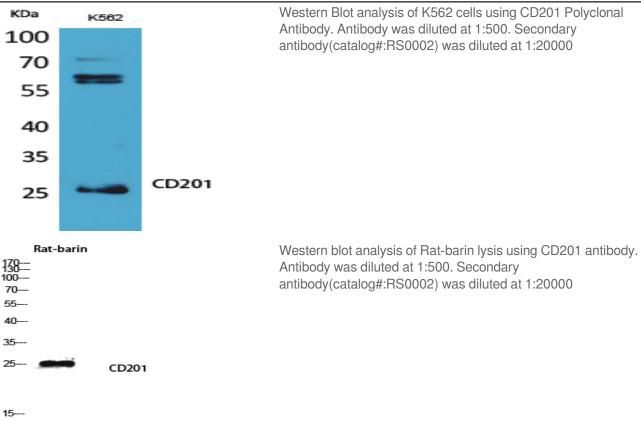

Catalog No :	YT5287
Reactivity :	Human;Mouse;Rat
Applications :	WB;IHC;IF;ELISA
Target :	CD201
Fields :	>>Complement and coagulation cascades
Gene Name :	PROCR
dene Name .	
Protein Name :	Endothelial protein C receptor
Human Gene Id :	10544
Human Swiss Prot	Q9UNN8
No:	
Mouse Gene Id :	19124
Mouse Swiss Prot	Q64695
No : Rat Gene Id :	362248
Rat Swiss Prot No :	Q4V8I1
Immunogen :	Synthesized peptide derived from Endothelial protein C receptor at AA range: 141-190
Specificity :	CD201 Polyclonal Antibody detects endogenous levels of CD201 protein.
Formulation :	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source :	Polyclonal, Rabbit,IgG
Dilution :	WB 1:500 - 1:2000. IHC: 1:100-300 ELISA: 1:20000 IF 1:50-200

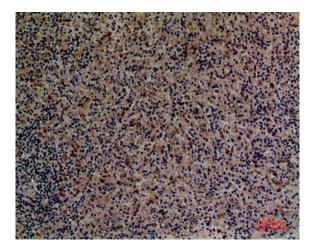

Purification :	The antibody was affinity-purified from rabbit antiserum by affinity-
	chromatography using epitope-specific immunogen.
Concentration :	1 mg/ml
Storage Stability :	-15°C to -25°C/1 year(Do not lower than -25°C)
otorage otability .	
Observed Dand	
Observed Band :	26kD
Background :	The protein encoded by this gene is a receptor for activated protein C, a serine
	protease activated by and involved in the blood coagulation pathway. The
	encoded protein is an N-glycosylated type I membrane protein that enhances the
	activation of protein C. Mutations in this gene have been associated with venous thromboembolism and myocardial infarction, as well as with late fetal loss during
	pregnancy. The encoded protein may also play a role in malarial infection and has
	been associated with cancer. [provided by RefSeq, Jul 2013],
Eurotion .	function/Dindo activated protain C. Enhanced protain C activation by the
Function :	function:Binds activated protein C. Enhances protein C activation by the thrombin-thrombomodulin complex; plays a role in the protein C pathway
	controlling blood coagulation.,PTM:A soluble form exists; probably released by a
	metalloprotease. Seems to have the same activity as the membrane-bound
	form.,PTM:N-glycosylated.,tissue specificity:Expressed strongly in the endothelial
	cells of arteries and veins in heart and lung, less intensely in capillaries in the lung
	and skin, and not at all in the endothelium of small vessels of the liver and kidney.,
Subcellular	Membrane; Single-pass type I membrane protein.
Location :	
	Exercise and starting the first start start start start start start starts and starts and starts and
Expression :	Expressed strongly in the endothelial cells of arteries and veins in heart and lung, less intensely in capillaries in the lung and skin, and not at all in the
	endothelium of small vessels of the liver and kidney.
Sort :	3451
No4 :	1
Host :	Rabbit
Modifications :	Unmodified
mounications.	onnounou
