

VEGF-C Polyclonal Antibody

Catalog No :	YT5297
Reactivity :	Human;Mouse;Rat
Applications :	WB;IHC;IF;ELISA
Target :	VEGF-C
Fields :	>>MAPK signaling pathway;>>Ras signaling pathway;>>Rap1 signaling pathway;>>Calcium signaling pathway;>>PI3K-Akt signaling pathway;>>Focal adhesion;>>TNF signaling pathway;>>Relaxin signaling pathway;>>AGE-RAGE signaling pathway in diabetic complications;>>Pathways in cancer
Gene Name :	VEGFC
Protein Name :	Vascular endothelial growth factor C
Human Gene Id :	7424
Human Swiss Prot	P49767
No : Mouse Gene Id :	22341
Mouse Swiss Prot	P97953
No : Rat Gene Id :	114111
Rat Swiss Prot No :	O35757
Immunogen :	The antiserum was produced against synthesized peptide derived from the Internal region of human VEGFC. AA range:91-140
Specificity :	VEGF-C Polyclonal Antibody detects endogenous levels of VEGF-C protein.
Formulation :	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source :	Polyclonal, Rabbit,IgG

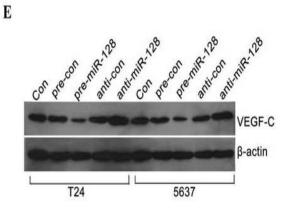

Best Tools for immunology Research	
Dilution :	WB 1:500 - 1:2000. IHC: 1:100-1:300. ELISA: 1:20000 IF 1:50-200
Purification :	The antibody was affinity-purified from rabbit antiserum by affinity-
	chromatography using epitope-specific immunogen.
Concentration :	1 mg/ml
Storage Stability :	-15°C to -25°C/1 year(Do not lower than -25°C)
Observed Dands	
Observed Band :	42kD
Call Dathway	Outoking outoking recenter interaction mTOP: Facel adhesion: Pathways in
Cell Pathway :	Cytokine-cytokine receptor interaction;mTOR;Focal adhesion;Pathways in cancer;Renal cell carcinoma;Pancreatic cancer;Bladder cancer;
Background :	The protein encoded by this gene is a member of the platelet-derived growth
- dong. o dina i	factor/vascular endothelial growth factor (PDGF/VEGF) family. The encoded
	protein promotes angiogenesis and endothelial cell growth, and can also affect
	the permeability of blood vessels. The proprotein is further cleaved into a fully
	processed form that can bind and activate VEGFR-2 and VEGFR-3 receptors. [provided by RefSeq, Apr 2014],
Function :	function:Growth factor active in angiogenesis, and endothelial cell growth,
	stimulating their proliferation and migration and also has effects on the
	permeability of blood vessels. May function in angiogenesis of the venous and
	lymphatic vascular systems during embryogenesis, and also in the maintenance
	of differentiated lymphatic endothelium in adults. Binds and activates VEGFR-2 (Flk1) and VEGFR-3 (Flt4) receptors.,PTM:Undergoes a complex proteolytic
	maturation which generates a variety of processed secreted forms with increased
	activity toward VEGFR-3, but only the fully processed form could activate
	VEGFR-2. VEGF-C first form an antiparallel homodimer linked by disulfide bonds.
	Before secretion, a cleavage occurs between Arg-227 and Ser-228 producing an
	heterotetramer. The next extracellular step of the processing removes the N- terminal propeptide. Finally the mature VEGF-C is compos
Subcellular	Secreted.
Location :	
Expression :	Spleen, lymph node, thymus, appendix, bone marrow, heart, placenta, ovary,
1 - C	skeletal muscle, prostate, testis, colon and small intestine and fetal liver, lung and
	kidney, but not in peripheral blood lymphocyte.
