

GCK/GLK Polyclonal Antibody

YT6093 Catalog No:

Reactivity: Human;Rat

Applications: WB;ELISA

Target: GCK/GLK

Fields: >>MAPK signaling pathway

Gene Name: MAP4K2/MAP4K3

Protein Name: GCK/GLK

Human Gene Id: 5871/8491

Human Swiss Prot

No:

Q12851/Q8IVH8

Synthesized peptide derived from human GCK/GLK. at AA range: 221-270 Immunogen:

Specificity: GCK/GLK Polyclonal Antibody detects endogenous levels of GCK/GLK

Formulation: Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Polyclonal, Rabbit, IgG Source:

Dilution: WB 1:500-2000, ELISA 1:10000-20000

Purification: The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

Concentration: 1 mg/ml

-15°C to -25°C/1 year(Do not lower than -25°C) **Storage Stability:**

Observed Band: 100kD

Cell Pathway: MAPK_ERK_Growth;MAPK_G_Protein;

Background: mitogen-activated protein kinase kinase kinase kinase 2(MAP4K2) Homo

sapiens The protein encoded by this gene is a member of the serine/threonine protein kinase family. Although this kinase is found in many tissues, its expression in lymphoid follicles is restricted to the cells of germinal centre, where it may participate in B-cell differentiation. This kinase can be activated by TNF-alpha, and has been shown to specifically activate MAP kinases. This kinase is also found to interact with TNF receptor-associated factor 2 (TRAF2), which is involved in the activation of MAP3K1/MEKK1. Alternative splicing results in

multiple transcript variants. [provided by RefSeq, Apr 2015],

Function: catalytic activity:ATP + a protein = ADP + a

phosphoprotein.,cofactor:Magnesium.,function:Enhances MAP3K1 oligomerization, which may relieve amino-terminal mediated MAP3K1

autoinhibition and lead to activation following autophosphorylation. May play a

role in the regulation of vesicle targeting or fusion., sequence

caution:Contaminating sequence. Sequence of unknown origin in the N-terminal part.,similarity:Belongs to the protein kinase superfamily. STE Ser/Thr protein

kinase family. STE20 subfamily., similarity: Contains 1 CNH

domain.,similarity:Contains 1 protein kinase domain.,subunit:Interacts with TRAF2, MAP3K1 and RAB8A.,tissue specificity:Highly expressed in germinal center but not mantle zone B-cells. Also expressed in lung, brain and placenta

and at lower levels in other tissues examined.,

Subcellular Cytoplasm . Basolateral cell membrane ; Peripheral membrane protein . Golgi apparatus membrane ; Peripheral membrane protein .

Expression: Highly expressed in germinal center but not mantle zone B-cells. Also expressed

in lung, brain and placenta and at lower levels in other tissues examined.

Sort: 6505

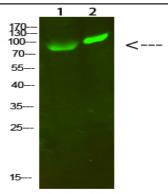

No4:

Host: Rabbit

Modifications: Unmodified
