

Granulins rabbit pAb

Catalog No: YT7987

Reactivity: Human; Rat; Mouse;

Applications: WB;ELISA

Target: Granulins

Gene Name: GRN

Protein Name: Granulins

Human Gene ld: 2896

Human Swiss Prot

No:

Mouse Swiss Prot

No:

Rat Gene ld: 29143

Rat Swiss Prot No: P23785

Immunogen: Synthesized peptide derived from human Granulins AA range: 520-600

Specificity: This antibody detects endogenous levels of Human Granulins

Formulation : Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Source: Polyclonal, Rabbit, IgG

Dilution: WB 1:1000-2000 ELISA 1:5000-20000

P28799

P28798

Purification: The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

Concentration: 1 mg/ml

1/2

Storage Stability: -15°C to -25°C/1 year(Do not lower than -25°C)

Molecularweight: 65kD

Background:

disease:Defects in GRN are the cause of ubiquitin-positive frontotemporal dementia (UP-FTD) [MIM:607485]; also known as tau-negative frontotemporal dementia linked to chromosome 17. Frontotemporal dementia (FTD) is the second most common cause of dementia in people under the age of 65 years. It is an autosomal dominant neurodegenerative disease.,function:Granulin-4 promotes proliferation of the epithelial cell line A431 in culture while granulin-3 acts as an antagonist to granulin-4, inhibiting the growth.,function:Granulins have possible cytokine-like activity. They may play a role in inflammation, wound repair, and tissue remodeling.,PTM:Granulins are disulfide bridged.,similarity:Belongs to the granulin family.,tissue specificity:In myelogenous leukemic cell lines of promonocytic, promyelocytic, and proerythroid lineage, in fibroblasts, and very strongly in epithelial cell lines. Present in inflammatory cells and bone marrow. Highest levels in kidney.,

Function:

in utero embryonic development, blastocyst development, blastocyst hatching, female pregnancy, embryo implantation, positive regulation of cell proliferation, embryonic development ending in birth or egg hatching, hatching, regulation of cell proliferation, chordate embryonic development, regulation of epithelial cell proliferation, positive regulation of epithelial cell proliferation,

Subcellular Location:

Secreted . Lysosome . Endocytosed by SORT1 and delivred to lysosomes (PubMed:21092856, PubMed:28073925). Targeted to lysosome by PSAP via M6PR and LRP1, in both biosynthetic and endocytic pathways (PubMed:26370502, PubMed:28073925). Co-localized with GBA in the intracellular trafficking compartments until to lysosome (By similarity).

Expression:

In myelogenous leukemic cell lines of promonocytic, promyelocytic, and proerythroid lineage, in fibroblasts, and very strongly in epithelial cell lines. Present in inflammatory cells and bone marrow. Highest levels in kidney.

Sort : 7085

No4: 1

Host: Rabbit
