

CD14 rabbit pAb

Catalog No: YT7957

Reactivity: Human; Rat; Mouse;

Applications: WB;ELISA

Target: CD14

Fields: >>MAPK signaling pathway;>>NF-kappa B signaling

pathway;>>Phagosome;>>Toll-like receptor signaling pathway;>>Hematopoietic cell lineage;>>Alcoholic liver disease;>>Shigellosis;>>Salmonella infection;>>Per

tussis;>>Legionellosis;>>Amoebiasis;>>Tuberculosis;>>Transcriptional

misregulation in cancer;>>Acute myeloid leukemia;>>Lipid and atherosclerosis

Gene Name: CD14

Protein Name: CD14

Human Gene Id: 929

Human Swiss Prot

No:

Mouse Gene Id: 12475

Mouse Swiss Prot

No:

Rat Gene Id: 60350

Rat Swiss Prot No: Q63691

Immunogen: Synthesized peptide derived from human CD14

P08571

P10810

Specificity: This antibody detects endogenous levels of Human CD14

Formulation : Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Source: Polyclonal, Rabbit, IgG

1/2

WB 1:1000-2000 ELISA 1:5000-20000 **Dilution:**

Purification: The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

Concentration: 1 mg/ml

-15°C to -25°C/1 year(Do not lower than -25°C) Storage Stability:

Molecularweight: 41kD

The protein encoded by this gene is a surface antigen that is preferentially **Background:**

> expressed on monocytes/macrophages. It cooperates with other proteins to mediate the innate immune response to bacterial lipopolysaccharide. Alternative

splicing results in multiple transcript variants encoding the same protein.

[provided by RefSeq, Mar 2010],

Function: function: Cooperates with MD-2 and TLR4 to mediate the innate immune

response to bacterial lipopolysaccharide (LPS). Acts via MyD88, TIRAP and

TRAF6, leading to NF-kappa-B activation, cytokine secretion and the

inflammatory response. Up-regulates cell surface molecules, including adhesion molecules., online information: CD14 entry, similarity: Contains 11 LRR (leucinerich) repeats., subunit: Belongs to the lipopolysaccharide (LPS) receptor, a multi-

protein complex containing at least CD14, MD-2 and TLR4..tissue

specificity: Expressed strongly on the surface of monocytes and weakly on the

surface of granulocytes; also expressed by most tissue macrophages.,

Subcellular Location:

Cell membrane; Lipid-anchor, GPI-anchor. Secreted. Membrane raft. Golgi

apparatus. Secreted forms may arise by cleavage of the GPI anchor. .

Expression: Detected on macrophages (at protein level) (PubMed:1698311). Expressed

strongly on the surface of monocytes and weakly on the surface of granulocytes;

also expressed by most tissue macrophages.
