

Caspase 2 (p12, Cleaved-Ala348) rabbit pAb

Catalog No: YC0117

Reactivity: Human; Rat; Mouse;

Applications: WB;ELISA

Target: Caspase-2

Fields: >>Apoptosis

Gene Name: CASP2 ICH1 NEDD2

P42575

P29594

Protein Name: Caspase2

Human Gene Id: 835

Human Swiss Prot

No:

Mouse Gene Id: 12366

Mouse Swiss Prot

No:

Rat Gene Id: 64314

Rat Swiss Prot No: P55215

Immunogen: Synthesized peptide derived from human Caspase 2 (p12, Cleaved-Ala348)

Specificity: This antibody detects endogenous levels of Human Caspase 2 (p12, Cleaved-

Ala348, protein was cleaved amino acid sequence between 347-348)

Formulation : Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Source: Polyclonal, Rabbit, IgG

Dilution: WB 1:1000-2000 ELISA 1:5000-20000

1/3

Purification: The antibody was affinity-purified from rabbit serum by affinity-chromatography

using specific immunogen.

Concentration: 1 mg/ml

Storage Stability: -15°C to -25°C/1 year(Do not lower than -25°C)

Observed Band: 12 50kD

Background: alternative products:Isoforms differ in the N- and C-termini,catalytic activity:Strict

requirement for an Asp residue at P1, with 316-asp being essential for proteolytic

activity and has a preferred cleavage sequence of Val-Asp-Val-Ala-

Asp-|-.,function:Involved in the activation cascade of caspases responsible for apoptosis execution. Might function by either activating some proteins required for cell death or inactivating proteins necessary for cell survival.,PTM:The mature

protease can process its own propeptide, but not that of other

caspases.,similarity:Belongs to the peptidase C14A family.,similarity:Contains 1 CARD domain.,subunit:Heterotetramer that consists of two anti-parallel arranged heterodimers, each one formed by a p18 subunit and a p12 subunit. Interacts with LRDD.,tissue specificity:Expressed at higher levels in the embryonic lung, liver and kidney than in the heart and brain. In adults, higher level expression is seen in the placenta, lung, kidney, and pancreas than in the heart, brain, liver and skeletal

muscle.,

Function: proteolysis, apoptosis, anti-apoptosis, induction of apoptosis, cell

death, induction of apoptosis by extracellular signals, regulation of cell

death, positive regulation of cell death, programmed cell death, induction of programmed cell death, death, protein processing, regulation of

apoptosis, positive regulation of apoptosis, negative regulation of apoptosis, regulation of apoptosis, regulation of apoptosis, regulation of apoptosis.

programmed cell death, negative regulation of programmed cell death, protein maturation, protein maturation by peptide bond cleavage, negative regulation of

cell death.

Expression: Expressed at higher levels in the embryonic lung, liver and kidney than in the

heart and brain. In adults, higher level expression is seen in the placenta, lung,

kidney, and pancreas than in the heart, brain, liver and skeletal muscle.

Sort : 3149

No4: 1

Host: Rabbit

Modifications: Unmodified
