Background : Plastins are a family of actin-binding proteins that are conserved throughout eukaryote evolution and expressed in most tissues of higher eukaryotes. In humans, two ubiquitous plastin isoforms (L and T) have been identified. Plastin 1 (otherwise known as Fimbrin) is a third distinct plastin isoform which is specifically expressed at high levels in the small intestine. The L isoform is expressed only in hemopoietic cell lineages, while the T isoform has been found in all other normal cells of solid tissues that have replicative potential (fibroblasts, endothelial cells, epithelial cells, melanocytes, etc.). However, L-plastin has been found in many types of malignant human cells of non-hemopoietic origin suggesting that its expression is induced accompanying tumorigenesis in solid tissues. Function : function:Actin-binding protein found in intestinal microvilli, hair cell stereocilia, and fibroblast filopodia.,PTM:Phosphorylated.,PTM:The N-terminus is blocked.,similarity:Contains 2 actin-binding domains.,similarity:Contains 2 EF-hand domains.,similarity:Contains 4 CH (calponin-homology) domains.,subunit:Monomer.,tissue specificity:Restricted to the spleen and other lymph node-containing organs. Expressed in neutrophils, monocytes, B lymphocytes, and myeloid cells.,

Subcellular Location : Cytoplasm, cytoskeleton . Cell junction . Cell projection . Cell projection, ruffle membrane ; Peripheral membrane protein ; Cytoplasmic side . Relocalizes to the immunological synapse between peripheral blood T-lymphocytes and antibody-presenting cells in response to costimulation through TCR/CD3 and CD2 or CD28 (PubMed:17294403). Associated with the actin cytoskeleton at membrane ruffles. Relocalizes to actin-rich cell projections upon serine phosphorylation (PubMed:16636079). .

Expression : Detected in intestinal microvilli, hair cell stereocilia, and fibroblast filopodia, in spleen and other lymph node-containing organs. Expressed in peripheral blood T-lymphocytes, neutrophils, monocytes, B-lymphocytes, and myeloid cells.
