

### EKLF (Acetyl Lys274) rabbit pAb

Catalog No: YK0151

**Reactivity:** Human; Rat; Mouse;

**Applications:** WB;ELISA

Target: EKLF

Gene Name: KLF1 EKLF

Protein Name: EKLF (Acetyl Lys274)

Q13351

P46099

Human Gene Id: 10661

**Human Swiss Prot** 

No:

**Mouse Swiss Prot** 

No:

Immunogen: Synthesized peptide derived from human EKLF (Acetyl Lys274)

**Specificity:** This antibody detects endogenous levels of Human EKLF (Acetyl Lys274)

**Formulation:** Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Source: Polyclonal, Rabbit, IgG

**Dilution:** WB 1:1000-2000 ELISA 1:5000-20000

**Purification:** The antibody was affinity-purified from rabbit serum by affinity-chromatography

using specific immunogen.

Concentration: 1 mg/ml

Storage Stability: -15°C to -25°C/1 year(Do not lower than -25°C)

Observed Band: 40kD

1/2

#### **Background:**

This gene encodes a hematopoietic-specific transcription factor that induces high-level expression of adult beta-globin and other erythroid genes. The zinc-finger protein binds to the DNA sequence CCACACCCT found in the beta hemoglobin promoter. Heterozygous loss-of-function mutations in this gene result in the dominant In(Lu) blood phenotype. [provided by RefSeq, Oct 2009],

#### **Function:**

function:Transcription regulator of erythrocyte development. Binds to the CACCC box in the beta-globin gene promoter and activates transcription. When sumoylation, acts as a Probably serves as a general switch factor for erythroid development. When sumoylated, acts as a transcriptional repressor, by promoting interaction with CDH2/MI2beta and also represses megakaryocytic differentiation.,PTM:Acetylated; can be acetylated on both Lys-274 and Lys-288. Acetylation on Lys-274 (by CBP) appears to be the major site affecting EKLF transactivation activity.,PTM:Phosphorylated primarily on serine residues in the transactivation domain. Phosphorylation on Thr-23 is critical for the transactivation activity.,PTM:Sumoylated; sumoylation, promoted by PIAS1, leads to repression of megakaryocyte differentiation. Also promotes the interaction with the CDH4 subunit of the NuRD repression complex.,simila

# Subcellular Location:

Nucleus . Colocalizes with SUMO1 in nuclear speckles. .

**Expression:** 

Expression restricted to adult bone marrow and fetal liver. Not expressed in myeloid nor lymphoid cell lines.

**Sort**: 5494

**No4**: 1

Host: Rabbit

Modifications: Acetyl
