

## CD34 (PN0493) Nb-FC recombinant antibody

Catalog No: YA0323

Reactivity: Human

**Applications:** ELISA;FCM

Target: CD34

Gene Name: CD34

Protein Name: Hematopoietic progenitor cell antigen CD34 (CD antigen CD34)

**Human Gene Id:** 947

**Human Swiss Prot** 

No:

Immunogen: Purified recombinant Human CD34

P28906

**Specificity:** This recombinant monoclonal antibody can detects endogenous levels of CD34

protein.

**Formulation:** Phosphate-buffered solution

Source: Camel, chimeric fusion of Nanobody (VHH) and mouse IgG1 Fc domain,

recombinantly produced from 293F cell

**Dilution:** ELISA 1:5000-100000;FCM 1-2µg/Test

**Purification:** Recombinant Expression and Affinity purified

**Concentration:** Please check the information on the tube

Storage Stability: -15°C to -25°C/1 year(Avoid freeze / thaw cycles)

**Background:** The protein encoded by This gene may play a role in the attachment of stem cells

to the bone marrow extracellular matrix or to stromal cells. This single-pass membrane protein is highly glycosylated and phosphorylated by protein kinase C.

Two transcript variants encoding different isoforms have been found for This gene.

[provided by RefSeq, Aug 2011]

**Function:** alternative products:Both isoforms are expressed on the cell surface.

CD34-T/CD34-F ratio increases with cell differentiation, developmental stage:On early hematopoietic progenitor cells., disease:Abnormal CD34 expression in leukemogenesis., Possible adhesion molecule with a role in early hematopoiesis by mediating the attachment of stem cells to the bone marrow extracellular matrix or directly to stromal cells. Could act as a scaffold for the attachment of lineage specific glycans, allowing stem cells to bind to lectins expressed by stromal cells or other marrow components. Presents carbohydrate ligands to selectins., online information:CD34 entry,PTM:Highly glycosylated.,PTM:Phosphorylated on serine residues by PKC., similarity:Belongs to the CD34 family., tissue

specificity:Selectively expressed on hematopoietic progenitor cells and the small vessel endothelium of a variety of tissues.

Subcellular Location :

Membrane; Single-pass type I membrane protein.

**Expression:** Selectively expressed on hematopoietic progenitor cells and the small vessel

endothelium of a variety of tissues.

Tag: recombinant

**Sort :** 3559

**No4**: 1

**Speciality:** Nanobody
