

CD34 (PN0494) Nb-FC recombinant antibody

Catalog No: YA0324

Reactivity: Human

Applications: ELISA

Target: CD34

Gene Name: CD34

Protein Name: Hematopoietic progenitor cell antigen CD34 (CD antigen CD34)

Human Gene Id: 947

Human Swiss Prot

No:

Immunogen: Purified recombinant Human CD34

P28906

Specificity: This recombinant monoclonal antibody can detects endogenous levels of CD34

protein.

Formulation: Phosphate-buffered solution

Source: Camel, chimeric fusion of Nanobody (VHH) and mouse IgG1 Fc domain,

recombinantly produced from 293F cell

Dilution: ELISA 1:5000-100000

Purification: Recombinant Expression and Affinity purified

Concentration: Please check the information on the tube

Storage Stability: -15°C to -25°C/1 year(Avoid freeze / thaw cycles)

Background: The protein encoded by This gene may play a role in the attachment of stem cells

to the bone marrow extracellular matrix or to stromal cells. This single-pass membrane protein is highly glycosylated and phosphorylated by protein kinase C.

Two transcript variants encoding different isoforms have been found for This gene.

[provided by RefSeq, Aug 2011]

Function: alternative products:Both isoforms are expressed on the cell surface.

CD34-T/CD34-F ratio increases with cell differentiation, developmental stage:On early hematopoietic progenitor cells., disease: Abnormal CD34 expression in leukemogenesis., Possible adhesion molecule with a role in early hematopoiesis by mediating the attachment of stem cells to the bone marrow extracellular matrix or directly to stromal cells. Could act as a scaffold for the attachment of lineage specific glycans, allowing stem cells to bind to lectins expressed by stromal cells or other marrow components. Presents carbohydrate ligands to selectins., online information:CD34 entry,PTM:Highly glycosylated.,PTM:Phosphorylated on serine residues by PKC., similarity:Belongs to the CD34 family., tissue

specificity:Selectively expressed on hematopoietic progenitor cells and the small

vessel endothelium of a variety of tissues.,

Subcellular Location:

Membrane; Single-pass type I membrane protein.

Expression: Selectively expressed on hematopoietic progenitor cells and the small vessel

endothelium of a variety of tissues.

Tag: recombinant

Sort : 3559

No4:

Speciality: Nanobody
