

CD62L (PN0040) Nb-FC recombinant antibody

Catalog No: YA0425

Reactivity: Human

Applications: ELISA

Target: CD62L

Gene Name: SELL LNHR LYAM1

Protein Name: L-selectin (CD62 antigen-like family member L) (Leukocyte adhesion molecule

1) (LAM-1) (Leukocyte surface antigen Leu-8) (Leukocyte-endothelial cell

adhesion molecule 1) (LECAM1) (Lymph node homing re

Human Gene Id: 6402

Human Swiss Prot

No:

Immunogen: Purified recombinant Human CD62L

P14151

Specificity: This recombinant monoclonal antibody can detects endogenous levels of CD62L

protein.

Formulation : Phosphate-buffered solution

Source: Camel, chimeric fusion of Nanobody (VHH) and mouse IgG1 Fc domain,

recombinantly produced from 293F cell

Dilution: ELISA 1:5000-100000

Purification: Recombinant Expression and Affinity purified

Concentration : Please check the information on the tube

Storage Stability: -15°C to -25°C/1 year(Avoid freeze / thaw cycles)

Background: CD62L is a 74-95 kD single chain type I glycoprotein referred to as L-selectin or

LECAM-1. It is expressed on most peripheral blood B cells, subsets of T and NK

cells, monocytes, granulocytes, and certain hematopoietic malignant cells. CD62L binds to carbohydrates present on certain glycoforms of CD34, glycam-1, and MAdCAM-1 and with a low affinity to anionic oligosaccharide sequences related to sialylated Lewis X (sLex, CD15s) through its C-type lectin domain. CD62L is important for the homing of naïve lymphocytes to high endothelial venules in peripheral lymph nodes and Peyer's patches. It also plays a role in leukocyte rolling on activated endothelial cells.

Function: Calcium-dependent lectin that mediates cell adhesion by binding to

glycoproteins on neighboring cells (PubMed:12403782, PubMed:28489325, PubMed:28011641). Mediates the adherence of lymphocytes to endothelial cells of high endothelial venules in peripheral lymph nodes. Promotes initial tethering and rolling of leukocytes in endothelia (PubMed:12403782, PubMed:28011641).

Subcellular Location:

Cell membrane; Single-pass type I membrane protein.

Expression: Expressed in B-cell lines and T-lymphocytes.

Tag: recombinant

Sort : 9999

No4:

Speciality: Nanobody
