9 11	(110110	, , , , , , , , ,	1 0 0 0 11 1 D 1	Halle al	ILIDO	-

Catalog No: YA0580

Reactivity: Human

Applications: ELISA

Target: GFP

Immunogen: Purified recombinant GFP

Specificity: This recombinant monoclonal antibody can detects endogenous levels of GFP

protein.

Formulation: Phosphate-buffered solution

Source: Camel, chimeric fusion of Nanobody (VHH) and mouse IgG1 Fc domain,

recombinantly produced from 293F cell

Dilution: ELISA 1:5000-100000

Purification: Recombinant Expression and Affinity purified

Concentration: Please check the information on the tube

Storage Stability: -15°C to -25°C/1 year(Avoid freeze / thaw cycles)

Background: Green Fluorescent Protein (GFP) has quickly become a powerful research tool

for assessing gene expression and subcellular protein distribution in fixed or living cells. GFP is excited by and brightly fluoresces when exposed to UV or blue light. This feature makes it ideal as a marker for use in fluorescence microscopy, cytometry, tagging fusion proteins, and assaying transcriptional regulation from gene promoters in vivo. Numerous GFP variants with enhanced and shifted emission spectra (blue, green, and yellow) have been developed through amino

acid substitutions at specific residues.

Tag: recombinant

Sort: 365
