

IL-6 (PN0460) Nb-FC recombinant antibody

Catalog No: YA0633

Reactivity: Human

Applications: ELISA

Target: IL6

Fields: >>EGFR tyrosine kinase inhibitor resistance;>>Antifolate resistance;>>Cytokine-

cytokine receptor interaction;>>Viral protein interaction with cytokine and cytokine receptor;>>HIF-1 signaling pathway;>>FoxO signaling pathway;>>PI3K-Akt signaling pathway;>>Cellular senescence;>>Toll-like receptor signaling

pathway;>>NOD-like receptor signaling pathway;>>Cytosolic DNA-sensing pathway;>>C-type lectin receptor signaling pathway;>>JAK-STAT signaling pathway;>>Hematopoietic cell lineage;>>IL-17 signaling pathway;>>Th17 cell differentiation;>>TNF signaling pathway;>>Intestinal immune network for IgA

production;>>Insulin resistance;>>Non-alcoholic fatty liver disease;>>AGE-RAGE signaling pathway in diabetic complications;>>Alcoholic liver

disease;>>Alzheimer disease;>>Prion disease;>>Pathways of neurodegeneration

- multiple diseases;>>Pathogenic Escherichia coli infection;>>Salmonella infection;>>Pertussis;>>Legionellosis;>>Yersinia infection;>>Chagas

disease;>>African trypanosomiasis;>>Malaria

Gene Name: IL6

Protein Name: Interleukin-6

Human Gene Id: 3569

Human Swiss Prot

No:

Immunogen: Purified recombinant Human IL6

P05231

Specificity: This recombinant monoclonal antibody can detects endogenous levels of IL6

protein.

Formulation: Phosphate-buffered solution

Source: Camel, chimeric fusion of Nanobody (VHH) and mouse IgG1 Fc domain,

recombinantly produced from 293F cell

Dilution: ELISA 1:5000-100000

Purification: Recombinant Expression and Affinity purified

Concentration: Please check the information on the tube

Storage Stability: -15°C to -25°C/1 year(Avoid freeze / thaw cycles)

Cell Pathway: Cytokine-cytokine receptor interaction; Toll_Like; NOD-like receptor; Cytosolic

DNA-sensing pathway; Jak STAT; Hematopoietic cell lineage; Intestinal immune

network for IgA production; Prion diseases; Pathway

Background : This gene encodes a cytokine that functions in inflammation and the maturation

of B cells. In addition, the encoded protein has been shown to be an endogenous pyrogen capable of inducing fever in people with autoimmune diseases or infections. The protein is primarily produced at sites of acute and chronic inflammation, where it is secreted into the serum and induces a transcriptional inflammatory response through interleukin 6 receptor, alpha. The functioning of this gene is implicated in a wide variety of inflammation-associated disease states, including suspectibility to diabetes mellitus and systemic juvenile rheumatoid arthritis. Alternative splicing results in multiple transcript variants.

[provided by RefSeq, Dec 2015],

Function: disease:At least 1 polymorphism in the IL6 gene renders HIV-infected men

susceptible to Kaposi sarcoma [MIM:148000]. Kaposi sarcoma is a sarcoma of spindle cells mixed with angiomatous tissue. A relatively rare malignant skin tumor that results in multifocal purplish coloured papules or plaques that eventually form nodules. Most commonly seen in patients who suffer from AIDS., disease: Genetic variations in IL6 are associated with susceptibility to systemic juvenile rheumatoid arthritis [MIM:604302]. Systemic juvenile rheumatoid arthritis is juvenile chronic arthritis associated with severe,

medical treatment, many children still experience early joint destruction,

necessitating surgical replacement, function: IL-6 is a cytokine with a wide variety

debilitating, extraarticular features, and occasionally fatal complications. Despite

of biological functions: it plays an essential role in the

Subcellular

Location:

Secreted.

Expression : Produced by skeletal muscle.

Tag: recombinant

Sort : 179

No1: ab233706

No4:	1

Speciality: Nanobody
