

## **FoxD3 Monoclonal Antibody**

Catalog No: YM0283

Reactivity: Human; Mouse; Monkey

**Applications:** WB;IHC;IF;ELISA

Target: FoxD3

Gene Name: FOXD3

**Protein Name:** Forkhead box protein D3

Q9UJU5

Q61060

Human Gene Id: 27022

**Human Swiss Prot** 

No:

Mouse Gene Id: 15221

**Mouse Swiss Prot** 

No:

**Immunogen:** Purified recombinant fragment of human FoxD3 expressed in E. Coli.

**Specificity:** FoxD3 Monoclonal Antibody detects endogenous levels of FoxD3 protein.

**Formulation:** Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

**Source:** Monoclonal, Mouse

**Dilution :** WB 1:500 - 1:2000. IHC 1:200 - 1:1000. ELISA: 1:10000.. IF 1:50-200

**Purification :** Affinity purification

Storage Stability: -15°C to -25°C/1 year(Do not lower than -25°C)

Molecularweight: 48kD

**Background:** 

This gene belongs to the forkhead family of transcription factors which is characterized by a distinct forkhead domain. Mutations in this gene cause autoimmune susceptibility 1. [provided by RefSeq, Nov 2008],

**Function:** 

disease:Defects in FOXD3 are associated with susceptibility to autoimmune disease type 1 (AIS1) [MIM:607836]; also called vitiligo-associated multiple autoimmune disease susceptibility type 2 (VAMAS2). Generalized vitiligo is an acquired disorder in which white patches of skin and hair result from autoimmune loss of melanocytes, often associated with other autoimmune disorders. Most cases occur in a sporadic family pattern suggesting polygenic, multifactorial inheritance. However, a striking family in which a somewhat unusual vitiligo phenotype has been described, characterized by progressively coalescent diffuse depigmentation and relatively early disease onset, segregated as an apparent autosomal dominant with incomplete penetrance.,function:Binds to the consensus sequence 5'-A[AT]T[AG]TTTGTTT-3' and acts as a transcriptional repressor. Also acts as a transcriptional activator. Promote

Subcellular Location :

Nucleus.

**Expression:** 

Expressed in chronic myeloid leukemia, Jurkat T-cell leukemia and teratocarcinoma cell lines, but not in any other cell lines or normal tissues examined.

Sort:

6225

No4:

1

Host:

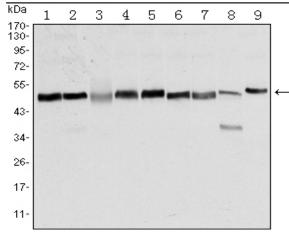

Mouse

**Modifications:** 

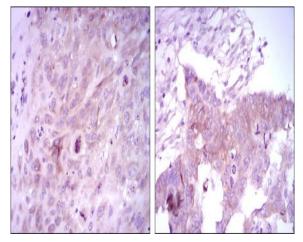

Unmodified
