

Pinch-1 Monoclonal Antibody

Catalog No :	YM0520
Reactivity :	Human
Applications :	WB;IF;FCM;ELISA
Target :	Pinch-1
Gene Name :	LIMS1
Protein Name :	LIM and senescent cell antigen-like-containing domain protein 1
Human Gene Id :	3987
Human Swiss Prot No :	P48059
Mouse Swiss Prot No :	Q99JW4
Immunogen :	Purified recombinant fragment of human Pinch-1 expressed in E. Coli.
Specificity :	Pinch-1 Monoclonal Antibody detects endogenous levels of Pinch-1 protein.
Formulation :	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source :	Monoclonal, Mouse
Dilution :	WB 1:500 - 1:2000. IF 1:200 - 1:1000. Flow cytometry: 1:200 - 1:400. ELISA: 1:10000. Not yet tested in other applications.
Purification :	Affinity purification
Storage Stability :	-15°C to -25°C/1 year(Do not lower than -25°C)
Molecularweight :	37kD
P References :	1. J Biol Chem. 2009 Feb 27;284(9):5836-44. 2. Proc Natl Acad Sci U S A. 2008 Dec 30;105(52):20677-82.

Background : The protein encoded by this gene is an adaptor protein which contains five LIM domains, or double zinc fingers. The protein is likely involved in integrin signaling through its LIM domain-mediated interaction with integrin-linked kinase, found in focal adhesion plaques. It is also thought to act as a bridge linking integrin-linked kinase to NCK adaptor protein 2, which is involved in growth factor receptor kinase signaling pathways. Its localization to the periphery of spreading cells also suggests that this protein may play a role in integrin-mediated cell adhesion or spreading. Several transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Jul 2010],

Function : function:Effector of integrin and growth factor signaling, coupling surface receptors to downstream signaling molecules involved in the regulation of cell survival, cell proliferation and cell differentiation. Focal adhesion protein part of the complex ILK-PINCH. This complex is considered to be one of the convergence points of integrin- and growth factor-signaling pathway.,similarity:Contains 5 LIM zinc-binding domains.,subunit:Interacts (via LIM zinc-binding 5) with TGFB11 (By similarity). Interacts (via LIM zinc-binding 1) with ILK. Interacts with SH3/SH2 adapter NCK2.,tissue specificity:In most tissues, except in the brain.,

Subcellular Location : Cell junction, focal adhesion. Cell membrane; Peripheral membrane protein; Cytoplasmic side.

Expression : Expressed in most tissues except in the brain.

Sort : 12711

No4 : 1

Host : Mouse

Modifications : Unmodified
