

COX IV Monoclonal Antibody(6C8), HRP Conjugated

Catalog No: YM2015

Reactivity: Human;Rat;Mouse

Applications: WB;IHC;IF;

Target: COX IV

Fields: >>Oxidative phosphorylation;>>Metabolic pathways;>>Cardiac muscle

contraction;>>Thermogenesis;>>Non-alcoholic fatty liver disease;>>Alzheimer disease;>>Parkinson disease;>>Amyotrophic lateral sclerosis;>>Huntington disease;>>Prion disease;>>Pathways of neurodegeneration - multiple diseases;>>Chemical carcinogenesis - reactive oxygen species;>>Diabetic

cardiomyopathy

Gene Name: COX4I1

Protein Name: Cytochrome c oxidase subunit 4 isoform 1, mitochondrial

Human Gene Id: 1327

Human Swiss Prot

No:

Specificity: COX IV Monoclonal Antibody(6C8) HRP Conjugated, specially designed for

your Western blot analysis.

Formulation: Liquid in PBS, pH 7.4, containing 0.02% sodium azide as preservative and 50%

Glycerol.

P13073

Source: Monoclonal, Mouse IgG1

Dilution: Optimal working dilutions should be determined experimentally by the

investigator. Suggested starting dilutions are as follows: WB 1:1000-3000, IHC

1:50-300.

Purification: The antibody was affinity-purified from mouse ascites by affinity-

chromatography using specific immunogen.

Concentration: 1mg/ml

1/3

Storage Stability: Stable for one year at -15°C to -25°C from date of shipment. For maximum

recovery of product, centrifuge the original vial after thawing and prior to removing

the cap. Aliquot to avoid repeated freezi

Molecularweight: 20kD

Cell Pathway: Oxidative phosphorylation; Cardiac muscle contraction; Alzheimer's

disease;Parkinson's disease;Huntington's disease;

Background : Cytochrome c oxidase (COX) is the terminal enzyme of the mitochondrial

respiratory chain. It is a multi-subunit enzyme complex that couples the transfer of electrons from cytochrome c to molecular oxygen and contributes to a proton electrochemical gradient across the inner mitochondrial membrane. The complex consists of 13 mitochondrial- and nuclear-encoded subunits. The mitochondrially-encoded subunits perform the electron transfer and proton pumping activities. The functions of the nuclear-encoded subunits are unknown but they may play a role in the regulation and assembly of the complex. This gene encodes the nuclear-encoded subunit IV isoform 1 of the human mitochondrial respiratory chain enzyme. It is located at the 3' of the NOC4 (neighbor of COX4) gene in a head-to-head orientation, and shares a promoter with it. Pseudogenes related

to this gene are located on chromosomes

Function: function: This protein is one of the nuclear-coded polypeptide chains of

cytochrome c oxidase, the terminal oxidase in mitochondrial electron transport., similarity: Belongs to the cytochrome c oxidase IV family., tissue

specificity: Ubiquitous.,

Subcellular Location:

Mitochondrion inner membrane ; Single-pass membrane protein .

Expression: Ubiquitous.

Tag: orthogonal

Sort : 432

No4: 1

Host: Mouse

Modifications: Unmodified

Conjugate: HRP
