

## β-actin Monoclonal Antibody(5B7), Cy3 Conjugated

| Catalog No :             | YM2193   |
|--------------------------|--|
| Depativity               |  |
| Reactivity :             | Human;Rat;Mouse;Mk;Dg;Ch;Hamster;Rabbit;Insect   |
| Applications :           | IF;WB;IHC  |
| Target :                 | Actin β  |
| Fields :                 | >>Rap1 signaling pathway;>>Phagosome;>>Apoptosis;>>Hippo signaling<br>pathway;>>Focal adhesion;>>Adherens junction;>>Tight junction;>>Platelet<br>activation;>>Neutrophil extracellular trap formation;>>Leukocyte transendothelial<br>migration;>>Thermogenesis;>>Regulation of actin cytoskeleton;>>Thyroid<br>hormone signaling pathway;>>Oxytocin signaling pathway;>>Gastric acid<br>secretion;>>Amyotrophic lateral sclerosis;>>Bacterial invasion of epithelial<br>cells;>>Vibrio cholerae infection;>>Pathogenic Escherichia coli<br>infection;>>Shigellosis;>>Salmonella infection;>>Yersinia infection;>>Influenza<br>A;>>Proteoglycans in cancer;>>Hepatocellular carcinoma;>>Hypertrophic<br>cardiomyopathy;>>Arrhythmogenic right ventricular cardiomyopathy;>>Dilated<br>cardiomyopathy;>>Viral myocarditis;>>Fluid shear stress and atherosclerosis |
| Gene Name :              | ACTB   |
| Protein Name :           | Actin cytoplasmic 1  |
| Human Gene Id :          | 60   |
| Human Swiss Prot<br>No : | P60709   |
| Specificity :            | β-actin Monoclonal Antibody(5B7) Cy3 Conjugated specially designed for your Immunofluorescence analysis.   |
| Formulation :            | Liquid in PBS, pH 7.4, containing 0.02% sodium azide as preservative and 50% Glycerol.   |
| Source :                 | Monoclonal, Mouse IgG1   |
| Dilution :               | Optimal working dilutions should be determined experimentally by the investigator. Suggested starting dilutions are as follows: WB 1:5000, IHC 1:200.  |

| Purification :            | The antibody was affinity-purified from mouse ascites by affinity-<br>chromatography using specific immunogen.  |
|---------------------------|---|
|                           |   |
| Concentration :           | 1mg/ml  |
| Storage Stability :       | Stable for one year at -15°C to -25°C from date of shipment. For maximum recovery of product, centrifuge the original vial after thawing and prior to removing the cap. Aliquot to avoid repeated freezi  |
| Cell Pathway :            | Focal adhesion;Adherens_Junction;Adherens_Junction;Leukocyte<br>transendothelial migration;Regulates Actin and Cytoskeleton;Vibrio cholerae<br>infection;Pathogenic Escherichia coli infection;Hypertrophic ca  |
| Background :              | This gene encodes one of six different actin proteins. Actins are highly conserved proteins that are involved in cell motility, structure, and integrity. This actin is a major constituent of the contractile apparatus and one of the two nonmuscle cytoskeletal actins. [provided by RefSeq, Jul 2008],  |
| Function :                | disease:Defects in ACTB are a cause of dystonia juvenile-onset (DYTJ)<br>[MIM:607371]. DYTJ is a form of dystonia with juvenile onset. Dystonia is defined<br>by the presence of sustained involuntary muscle contraction, often leading to<br>abnormal postures. DYTJ patients manifest progressive, generalized, dopa-<br>unresponsive dystonia, developmental malformations and sensory hearing<br>loss.,function:Actins are highly conserved proteins that are involved in various<br>types of cell motility and are ubiquitously expressed in all eukaryotic<br>cells.,miscellaneous:In vertebrates 3 main groups of actin isoforms, alpha, beta<br>and gamma have been identified. The alpha actins are found in muscle tissues<br>and are a major constituent of the contractile apparatus. The beta and gamma<br>actins coexist in most cell types as components of the cytoskeleton and as<br>mediators of internal cell motility.,similarity:Belongs to the |
| Subcellular<br>Location : | Cytoplasm, cytoskeleton . Nucleus . Localized in cytoplasmic mRNP granules containing untranslated mRNAs  |
| Expression :              | B-cell lymphoma,Brain,Cajal-Retzius cell,Eye,Fetal brain cortex,Foreskin,Hepatocellular car   |
| Sort :                    | 24857   |
| No4 :                     | 1   |
| Host :                    | Mouse   |
| Modifications :           | Unmodified  |
| Conjugate :               | СуЗ   |
