

HO-1 protein

Catalog No: YD0037

Reactivity: Human

Applications: WB;SDS-PAGE

Gene Name: HMOX1 HO HO1

Protein Name: HO-1 protein

Sequence: Amino acid: 175-266, with his-MBP tag.

P09601

P14901

Human Gene Id: 3162

Human Swiss Prot

No:

Mouse Swiss Prot

No:

Formulation : Liquid in PBS

Source: E.coli

Dilution : WB 1:500-2000

Concentration: SDS-PAGE >90%

Storage Stability: -20°C/6 month,-80°C for long storage

Background: catalytic activity:Heme + 3 AH(2) + 3 O(2) = biliverdin + Fe(2+) + CO + 3 A + 3

H(2)O.,function:Heme oxygenase cleaves the heme ring at the alpha methene bridge to form biliverdin. Biliverdin is subsequently converted to bilirubin by biliverdin reductase. Under physiological conditions, the activity of heme oxygenase is highest in the spleen, where senescent erythrocytes are sequestrated and destroyed.,induction:Heme oxygenase 1 activity is highly inducible by its substrate heme and by various non-heme substances such as

heavy metals, bromobenzene, endotoxin, oxidizing agents and

UVA., similarity: Belongs to the heme oxygenase family.,

response to reactive oxygen species, angiogenesis, blood vessel

Function:

development, response to hypoxia, regulation of cytokine production, negative regulation of cytokine production, endothelial cell proliferation, vasculature development, healing during inflammatory response, negative regulation of immune system process, regulation of leukocyte migration, negative regulation of leukocyte migration, regulation of leukocyte activation, negative regulation of leukocyte activation, regulation of immune effector process, negative regulation of immune effector process, regulation of production of molecular mediator of immune response, negative regulation of production of molecular mediator of cytokine production during immune response, negative regulation of cytokine production during immune response, regulation of myeloid leu

Subcellular Location:

Endoplasmic reticulum membrane ; Single-pass type IV membrane protein ;

Cytoplasmic side.

Expression: Expressed at higher levels in renal cancer tissue than in normal tissue (at protein

level).

Sort : 7739

Host: Rabbit
