

## **Dynamin I Polyclonal Antibody**

Catalog No: YT1428

**Reactivity:** Human; Mouse; Rat

**Applications:** WB;IHC;IF;ELISA

Target: Dynamin I

**Fields:** >>Phospholipase D signaling pathway;>>Endocytosis;>>Synaptic vesicle

cycle;>>Endocrine and other factor-regulated calcium reabsorption;>>Bacterial

invasion of epithelial cells

Q05193

P39053

Gene Name: DNM1

Protein Name: Dynamin-1

**Human Gene Id:** 1759

**Human Swiss Prot** 

No:

Mouse Gene ld: 13429

**Mouse Swiss Prot** 

No:

Rat Gene Id: 140694

Rat Swiss Prot No: P21575

Immunogen: The antiserum was produced against synthesized peptide derived from human

Dynamin-1. AA range:740-789

**Specificity:** Dynamin I Polyclonal Antibody detects endogenous levels of Dynamin I protein.

**Formulation:** Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Source: Polyclonal, Rabbit, IgG

**Dilution :** WB 1:500 - 1:2000. IHC 1:100 - 1:300. ELISA: 1:40000.. IF 1:50-200

1/4

**Purification:** The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

**Concentration:** 1 mg/ml

-15°C to -25°C/1 year(Do not lower than -25°C) Storage Stability:

Observed Band: 97kD

Endocytosis; Fc gamma R-mediated phagocytosis; **Cell Pathway:** 

**Background:** dynamin 1(DNM1) Homo sapiens This gene encodes a member of the dynamin

> subfamily of GTP-binding proteins. The encoded protein possesses unique mechanochemical properties used to tubulate and sever membranes, and is involved in clathrin-mediated endocytosis and other vesicular trafficking processes. Actin and other cytoskeletal proteins act as binding partners for the

activity. More than sixty highly conserved copies of the 3' region of this gene are found elsewhere in the genome, particularly on chromosomes Y and 15. Alternatively spliced transcript variants encoding different isoforms have been

encoded protein, which can also self-assemble leading to stimulation of GTPase

described. [provided by RefSeq, Jul 2008],

**Function:** catalytic activity:GTP + H(2)O = GDP + phosphate.,function:Microtubule-

> associated force-producing protein involved in producing microtubule bundles and able to bind and hydrolyze GTP. Most probably involved in vesicular

trafficking processes, in particular endocytosis., similarity: Belongs to the dynamin

family., similarity: Contains 1 GED domain., similarity: Contains 1 PH

domain., subcellular location: Microtubule-associated., subunit: Interacts with CAV1

and SH3GLB1. Binds SH3GL1, SH3GL2 and SH3GL3.,

Subcellular

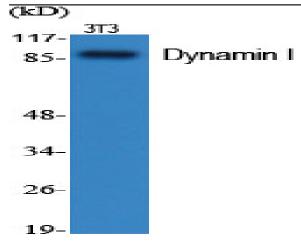

Location:

**Expression:** 

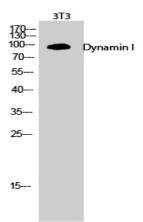

Cytoplasm. Cytoplasm, cytoskeleton. Microtubule-associated.

Brain, Platelet, PNS,
