

Histone H2B Polyclonal Antibody

Catalog No :	YT2157			
Reactivity :	Human;Mouse;Monkey			
Applications :	WB;IHC;IF;ELISA			
Target :	Histone H2B			
Fields :	>>Neutrophil extracellular trap formation;>>Alcoholism;>>Viral carcinogenesis;>>Systemic lupus erythematosus			
Gene Name :	H2BFS			
Protein Name :	Histone H2B type F-S			
Human Gene Id :	54145			
Human Swiss Prot No :	P57053			
Immunogen :	The antiserum was produced against synthesized peptide derived from human Histone H2B. AA range:10-59			
Specificity :	Histone H2B Polyclonal Antibody detects endogenous levels of Histone H2B protein.			
Formulation :	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.			
Source :	Polyclonal, Rabbit,IgG			
Dilution :	WB 1:500 - 1:2000. IHC 1:100 - 1:300. IF 1:200 - 1:1000. ELISA: 1:5000. Not yet tested in other applications.			
Purification :	The antibody was affinity-purified from rabbit antiserum by affinity- chromatography using epitope-specific immunogen.			
Concentration :	1 mg/ml			
Storage Stability :	-15°C to -25°C/1 year(Do not lower than -25°C)			

14kD

Observed Band :

Cell Pathway : Protein Acetylation

H2BFS is a Pseudogene. Histone H2B type 1-H is a core component of **Background:** nucleosome. Nucleosomes wrap and compact DNA into chromatin, limiting DNA accessibility to the cellular machineries which require DNA as a template. Histones thereby play a central role in transcription regulation, DNA repair, DNA replication and chromosomal stability. DNA accessibility is regulated via a complex set of post-translational modifications of histones, also called histone code, and nucleosome remodeling. Has broad antibacterial activity. May contribute to the formation of the functional antimicrobial barrier of the colonic epithelium, and to the bactericidal activity of amniotic fluid. Diseases associated with H2BFS include endometrial stromal sarcoma. Among its related pathways are Packaging Of Telomere Ends. Gene Ontology (GO) annotations related to this gene include sequence-specific DNA binding and protein heterodimerization activity. An important paralog of this gene is HIST1H2BH.

Function:

DNA packaging, chromatin organization, chromatin assembly or disassembly, nucleosome assembly, defense response, response to bacterium, chromatin assembly, cellular macromolecular complex subunit organization, cellular macromolecular complex assembly, nucleosome organization, defense response to bacterium, macromolecular complex subunit organization, chromosome organization, macromolecular complex assembly, protein-DNA complex assembly,
