

## **IL-11 Polyclonal Antibody**

Catalog No: YT2309

**Reactivity:** Human; Mouse; Rat

**Applications:** IHC;IF;ELISA

Target: IL-11

**Fields:** >>Cytokine-cytokine receptor interaction;>>JAK-STAT signaling

pathway;>>Hematopoietic cell lineage;>>Rheumatoid arthritis

Gene Name: IL11

Protein Name: Interleukin-11

Human Gene Id: 3589

**Human Swiss Prot** 

No:

Mouse Gene Id: 16156

**Mouse Swiss Prot** 

No:

Rat Swiss Prot No: Q99MF5

**Immunogen:** The antiserum was produced against synthesized peptide derived from human

IL-11. AA range:27-76

P20809

P47873

**Specificity:** IL-11 Polyclonal Antibody detects endogenous levels of IL-11 protein.

**Formulation :** Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Source: Polyclonal, Rabbit, IgG

**Dilution:** IHC 1:100 - 1:300. ELISA: 1:5000.. IF 1:50-200

**Purification:** The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

**Concentration**: 1 mg/ml

**Storage Stability:** -15°C to -25°C/1 year(Do not lower than -25°C)

Molecularweight: 21kD

**Cell Pathway:** Cytokine-cytokine receptor interaction; Jak\_STAT; Hematopoietic cell lineage;

**Background :** The protein encoded by this gene is a member of the gp130 family of cytokines.

These cytokines drive the assembly of multisubunit receptor complexes, all of which contain at least one molecule of the transmembrane signaling receptor IL6ST (gp130). This cytokine is shown to stimulate the T-cell-dependent development of immunoglobulin-producing B cells. It is also found to support the proliferation of hematopoietic stem cells and megakaryocyte progenitor cells. Alternatively spliced transcript variants encoding distinct isoforms have been

found for this gene. [provided by RefSeq, Jun 2012],

**Function:** function:Directly stimulates the proliferation of hematopoietic stem cells and

megakaryocyte progenitor cells and induces megakaryocyte maturation resulting in increased platelet production.,online information:Clinical information on

Neumega, online information:Interleukin-11 entry, pharmaceutical:Available under the name Neumega (Wyeth). Used for the prevention of severe thrombocytopenia and the reduction of the need for platelet transfusion following myelosuppressive

chemotherapy., similarity: Belongs to the IL-6 superfamily.,

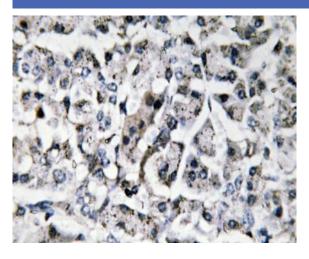

Subcellular

Location:

**Expression:** Bone marrow, Prostate,

Secreted.
