

Olfactory receptor 4K17 Polyclonal Antibody

YT3348 Catalog No:

Reactivity: Human;Rat;Mouse;

Applications: IF;ELISA

Olfactory receptor 4K17 **Target:**

Fields: >>Olfactory transduction

Gene Name: **OR4K17**

Protein Name: Olfactory receptor 4K17

Human Gene Id: 390436

Human Swiss Prot

No:

Q8NGC6

The antiserum was produced against synthesized peptide derived from human Immunogen:

OR4K17. AA range:263-312

Olfactory receptor 4K17 Polyclonal Antibody detects endogenous levels of **Specificity:**

Olfactory receptor 4K17 protein.

Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Formulation:

Source: Polyclonal, Rabbit, IgG

Dilution: IF 1:200 - 1:1000. ELISA: 1:20000. Not yet tested in other applications.

The antibody was affinity-purified from rabbit antiserum by affinity-**Purification:**

chromatography using epitope-specific immunogen.

Concentration: 1 mg/ml

Storage Stability: -15°C to -25°C/1 year(Do not lower than -25°C)

Molecularweight: 35kD

1/2

Cell Pathway : Olfactory transduction;

Background : Olfactory receptors interact with odorant molecules in the nose, to initiate a

neuronal response that triggers the perception of a smell. The olfactory receptor proteins are members of a large family of G-protein-coupled receptors (GPCR)

arising from single coding-exon genes. Olfactory receptors share a

7-transmembrane domain structure with many neurotransmitter and hormone receptors and are responsible for the recognition and G protein-mediated transduction of odorant signals. The olfactory receptor gene family is the largest in the genome. The nomenclature assigned to the olfactory receptor genes and proteins for this organism is independent of other organisms. [provided by

RefSeq, Jul 2008],

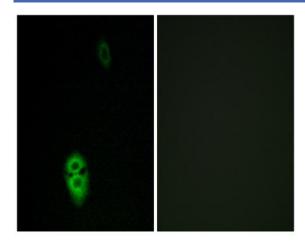

Function: function:Odorant receptor .,similarity:Belongs to the G-protein coupled receptor

1 family.,

Subcellular Location:

Cell membrane; Multi-pass membrane protein.
