

Olfactory receptor 89 Polyclonal Antibody

Catalog No: YT3438

Reactivity: Human; Rat; Mouse;

Applications: WB;ELISA

Target: Olfactory receptor 89

Gene Name: olfr89

Protein Name: Olfactory receptor 89

O95499

Human Gene Id: 26701

Human Swiss Prot

No:

Immunogen: The antiserum was produced against synthesized peptide derived from human

OR89. AA range:220-269

Specificity: Olfactory receptor 89 Polyclonal Antibody detects endogenous levels of

Olfactory receptor 89 protein.

Formulation : Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Source: Polyclonal, Rabbit, IgG

Dilution: WB 1:500 - 1:2000. ELISA: 1:20000. Not yet tested in other applications.

Purification: The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

Concentration: 1 mg/ml

Storage Stability: -15°C to -25°C/1 year(Do not lower than -25°C)

Observed Band: 35kD

Background: Olfactory receptors interact with odorant molecules in the nose, to initiate a

1/2

neuronal response that triggers the perception of a smell. The olfactory receptor proteins are members of a large family of G-protein-coupled receptors (GPCR) arising from single coding-exon genes. Olfactory receptors share a 7-transmembrane domain structure with many neurotransmitter and hormone receptors and are responsible for the recognition and G protein-mediated transduction of odorant signals. The olfactory receptor gene family is the largest in the genome. The nomenclature assigned to the olfactory receptor genes and proteins for this organism is independent of other organisms.
