

RAP1 Polyclonal Antibody

Catalog No: YT4005

Reactivity: Human; Rat; Mouse;

Applications: WB;IHC

Target: RAP1

Gene Name: TERF2IP

Protein Name: Telomeric repeat-binding factor 2-interacting protein 1

Human Gene Id: 54386

Human Swiss Prot

. .

No:

Mouse Swiss Prot

No:

Immunogen: The antiserum was produced against synthesized peptide derived from human

RAP1. AA range:203-252

Q9NYB0

Q91VL8

Specificity: RAP1 Polyclonal Antibody detects endogenous levels of RAP1 protein.

Formulation : Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Source: Polyclonal, Rabbit, IgG

Dilution: WB 1:500-2000;IHC 1:50-300

Purification: The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

Concentration: 1 mg/ml

Storage Stability: -15°C to -25°C/1 year(Do not lower than -25°C)

Observed Band: 55kD

1/3

Cell Pathway : B_Cell_Antigen; Adherens_Junction

Background : The gene encodes a protein that is part of a complex involved in telomere length

regulation. Pseudogenes are present on chromosomes 5 and 22. [provided by

RefSeq, Apr 2010],

Function: function: May play a role in telomere length regulation. Component of the

shelterin complex (telosome) that is involved in the regulation of telomere length and protection. Shelterin associates with arrays of double-stranded TTAGGG repeats added by telomerase and protects chromosome ends; without its protective activity, telomeres are no longer hidden from the DNA damage surveillance and chromosome ends are inappropriately processed by DNA repair pathways.,miscellaneous:Recruited to telomeres by TRF2; seemingly it does not directly bind to DNA itself.,PTM:Phosphorylated upon DNA damage, probably by ATM or ATR.,sequence caution:Translated as Glu.,similarity:Contains 1 BRCT domain.,similarity:Contains 1 Myb-like domain.,subcellular location:Colocalizes with telomeric DNA in interphase and metaphase cells.,subunit:Homodimer.

Component of the shelterin complex (telosome) composed of TERF1, TE

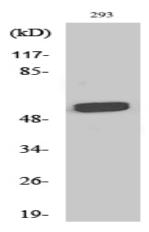

Subcellular Location:

Nucleus . Cytoplasm . Chromosome . Chromosome, telomere . Associates with chromosomes, both at telomeres and in extratelomeric sites. Also exists as a

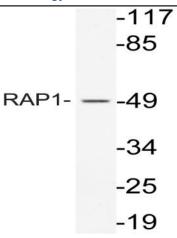

cytoplasmic form, where it associates with the IKK complex. .

Expression: Ubiquitous. Highly expressed.
