

SEC22B Polyclonal Antibody

Catalog No: YT5680

Reactivity: Human; Mouse; Rat

Applications: WB;IHC;IF;ELISA

Target: SEC22B

Fields: >>SNARE interactions in vesicular transport;>>Phagosome;>>Legionellosis

Gene Name: SEC22B

Protein Name: Vesicle-trafficking protein SEC22b

O75396

O08547

Human Gene ld: 9554

Human Swiss Prot

No:

Mouse Gene ld: 20333

Mouse Swiss Prot

No:

Rat Gene Id: 310710

Rat Swiss Prot No: Q4KM74

Immunogen: Synthesized peptide derived from the Internal region of human SEC22B.

Specificity: SEC22B Polyclonal Antibody detects endogenous levels of SEC22B protein.

Formulation : Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Source: Polyclonal, Rabbit, IgG

Dilution : WB 1:500 - 1:2000. IHC: 1:100-1:300. ELISA: 1:10000.. IF 1:50-200

Purification: The antibody was affinity-purified from rabbit antiserum by affinity-

1/3

chromatography using epitope-specific immunogen.

Concentration: 1 mg/ml

Storage Stability: -15°C to -25°C/1 year(Do not lower than -25°C)

Observed Band: 23kD

Cell Pathway: SNARE interactions in vesicular transport;

Background: The protein encoded by this gene is a member of the SEC22 family of vesicle

trafficking proteins. It seems to complex with SNARE and it is thought to play a role in the ER-Golgi protein trafficking. This protein has strong similarity to Mus musculus and Cricetulus griseus proteins. [provided by RefSeq, Sep 2009],

Function: function:SNARE involved in targeting and fusion of ER-derived transport

vesicles with the Golgi complex as well as Golgi-derived retrograde transport vesicles with the ER.,PTM:Phosphorylated upon DNA damage, probably by ATM or ATR.,similarity:Belongs to the synaptobrevin family.,similarity:Contains 1 longin domain.,similarity:Contains 1 v-SNARE coiled-coil homology domain.,subcellular location:Identified by mass spectrometry in melanosome fractions from stage I to stage IV.,subunit:Component of two distinct SNARE complexes consisting of STX5, GOSR2/BOS1, BET1 and SEC22B or STX18, USE1L, BNIP1/SEC20L

and SEC22B. YKT6 can probably replace SEC22B in either complex.,

Subcellular Location:

Endoplasmic reticulum membrane ; Single-pass type IV membrane protein . Endoplasmic reticulum-Golgi intermediate compartment membrane . Golgi apparatus, cis-Golgi network membrane . Golgi apparatus, trans-Golgi network

membrane . Melanosome . Concentrated most in the intermediate

compartment/cis-Golgi network and the cis-Golgi cisternae 1 and 2. Greatly reduced in concentration at the trans end of the Golgi apparatus (By similarity). Identified by mass spectrometry in melanosome fractions from stage I to stage IV

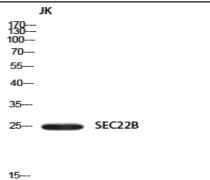

(PubMed:17081065)...

Expression: Caudate nucleus, Platelet, Skin, Umbilical cor
