Background : This gene encodes a predicted type-I membrane glycoprotein. The encoded protein may play a role in functioning of the central nervous system. [provided by RefSeq, Jul 2008],

Function : function:May have a role in brain function.,similarity:Belongs to the TMEM59 family.,subcellular location:Could be associated with an intracellular organelle or membrane.,tissue specificity:Expressed preferentially at high level in the brain.,

Subcellular Location : Golgi apparatus membrane ; Single-pass type I membrane protein .

Expression : Expressed preferentially at high level in the brain.
