Background : This gene encodes a member of the tectonic gene family which functions in Hedgehog signal transduction and development of the neural tube. Mutations in this gene have been associated with Orofaciodigital Syndrome IV and Joubert Syndrom 18. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this gene. [provided by RefSeq, Sep 2012],

Function : function:May be involved in apoptosis regulation.,similarity:Belongs to the tectonic family.,

Subcellular Location : Membrane ; Single-pass type I membrane protein .
