

AGRP rabbit pAb

Catalog No :	YT7903
Reactivity :	Human;Mouse
Applications :	WB;ELISA
Target :	AGRP
Fields :	>>Adipocytokine signaling pathway
Gono Namo :	
Gene Name :	
Protein Name :	AGRP
Human Gene Id :	181
Human Swiss Prot	O00253
No :	
Mouse Gene Id :	11604
Mouse Swiss Prot	P56473
No : Immunogen :	Synthesized peptide derived from human AGRP
Specificity	This antibody dotocts and gapous loyals of Human AGRP
Specificity :	This antibody detects endogenous levels of Human AGRE
Formulation :	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source :	Polyclonal, Rabbit,IgG
Dilution :	WB 1:1000-2000 ELISA 1:5000-20000
Purification :	The antibody was affinity-purified from rabbit antiserum by affinity- chromatography using epitope-specific immunogen.
Concentration :	1 mg/ml

Best loois for immunology Research	
Storage Stability :	-15°C to -25°C/1 year(Do not lower than -25°C)
Molecularweight :	15kD
Background :	disease:Defects in AGRP may be a cause of autosomal dominant obesity [MIM:601665].,domain:The presence of a 'disulfide through disulfide knot' structurally defines this protein as a knottin.,function:Plays a role in weight homeostasis. May play a role in the regulation of melanocortin receptors within the hypothalamus and adrenal gland, and therefore in the central control of feeding.,similarity:Contains 1 agouti domain.,tissue specificity:Expressed primarily in the adrenal gland, subthalamic nucleus, and hypothalamus, with a lower level of expression occurring in testis, lung, and kidney.,
Function :	cell surface receptor linked signal transduction, G-protein coupled receptor protein signaling pathway, neuropeptide signaling pathway, intracellular signaling cascade, behavior, feeding behavior, adult feeding behavior, response to endogenous stimulus, response to hormone stimulus, hormone-mediated signaling, response to organic substance, adult behavior, cellular response to hormone stimulus, eating behavior,
Subcellular Location :	Secreted . Golgi apparatus lumen .
Expression :	Expressed primarily in the adrenal gland, subthalamic nucleus, and hypothalamus, with a lower level of expression occurring in testis, lung, and kidney.
