

## Ku-70 (Acetyl Lys331) Polyclonal Antibody

Catalog No: YK0043

Reactivity: Human; Mouse; Rat

**Applications:** WB;IHC

Target: Ku70/XRCC6

**Fields:** >>Non-homologous end-joining

Gene Name: XRCC6

**Protein Name:** X-ray repair cross-complementing protein 6

**Human Gene Id:** 2547

**Human Swiss Prot** 

**Prot** P12956

P23475

No:

Mouse Gene Id: 14375

**Mouse Swiss Prot** 

No:

Immunogen: The antiserum was produced against synthesized Acetyl-peptide derived from

human Ku70 around the Acetylation site of Lys331. AA range:291-340

**Specificity:** Acetyl-Ku-70 (K331) Polyclonal Antibody detects endogenous levels of Ku-70

protein only when acetylated at K331.

**Formulation :** Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Source: Polyclonal, Rabbit, IgG

**Dilution:** WB 1:500-2000;IHC 1:50-300

**Purification:** The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

Concentration: 1 mg/ml

1/3

Storage Stability: -15°C to -25°C/1 year(Do not lower than -25°C)

Observed Band: 70kD

**Cell Pathway:** Non-homologous end-joining;

**Background:** The p70/p80 autoantigen is a nuclear complex consisting of two subunits with

molecular masses of approximately 70 and 80 kDa. The complex functions as a single-stranded DNA-dependent ATP-dependent helicase. The complex may be involved in the repair of nonhomologous DNA ends such as that required for double-strand break repair, transposition, and V(D)J recombination. High levels of autoantibodies to p70 and p80 have been found in some patients with systemic

lupus erythematosus. [provided by RefSeq, Jul 2008],

**Function:** developmental stage:Expression does not increase during promyelocyte

differentiation., disease: Individuals with systemic lupus erythematosus (SLE) and related disorders produce extremely large amounts of autoantibodies to p70 and p86. Existence of a major autoantigenic epitope or epitopes on the C-terminal 190 amino acids of p70 containing the leucine repeat. The majority of autoantibodies

to p70 in most sera from patients with SLE seem to be reactive with this

region.,function:Single stranded DNA-dependent ATP-dependent helicase. Has a

role in chromosome translocation. The DNA helicase II complex binds

preferentially to fork-like ends of double-stranded DNA in a cell cycle-dependent manner. It works in the 3'-5' direction. Binding to DNA may be mediated by p70. Involved in DNA nonhomologous end joining (NHEJ) required for double-strand

break repair and V(D)J recombination. The Ku p70/p86

Subcellular Location:

Nucleus . Chromosome .

**Expression:** Brain, Cervix carcinoma, Epithelium, Heart, Hepatocyte, Kidney, Liver, Lun

## **Products Images**

Western Blot analysis of 4T1 cells using Acetyl-Ku-70 (K331) Polyclonal Antibody. Secondary antibody(catalog#:RS0002) was diluted at 1:20000

Immunohistochemical analysis of paraffin-embedded human Squamous cell carcinoma of lung. 1, Antibody was diluted at 1:200(4° overnight). 2, Tris-EDTA,pH9.0 was used for antigen retrieval. 3,Secondary antibody was diluted at 1:200(room temperature, 45min).
