

## CD62L (PN0043) Nb-FC recombinant antibody

| Catalog No :             | YA0428   |
|--------------------------|--|
| Reactivity :             | Human  |
| Applications :           | ELISA;FCM  |
| Target :                 | CD62L  |
| Gene Name :              | SELL LNHR LYAM1  |
| Protein Name :           | L-selectin (CD62 antigen-like family member L) (Leukocyte adhesion molecule 1) (LAM-1) (Leukocyte surface antigen Leu-8) (Leukocyte-endothelial cell adhesion molecule 1) (LECAM1) (Lymph node homing re |
| Human Gene Id :          | 6402   |
| Human Swiss Prot<br>No : | P14151   |
| Immunogen :              | Purified recombinant Human CD62L   |
| Specificity :            | This recombinant monoclonal antibody can detects endogenous levels of CD62L protein.   |
| Formulation :            | Phosphate-buffered solution  |
| Source :                 | Camel, chimeric fusion of Nanobody (VHH) and mouse $\mbox{IgG1}$ Fc domain , recombinantly produced from 293F cell   |
| Dilution :               | ELISA 1:5000-100000 FCM 1-2µg/Test   |
| Purification :           | Recombinant Expression and Affinity purified   |
| Concentration :          | Please check the information on the tube   |
| Storage Stability :      | -15°C to -25°C/1 year(Avoid freeze / thaw cycles)  |
| Background :             | CD62L is a 74-95 kD single chain type I glycoprotein referred to as L-selectin or LECAM-1. It is expressed on most peripheral blood B cells, subsets of T and NK   |

|                           | cells, monocytes, granulocytes, and certain hematopoietic malignant cells. CD62L binds to carbohydrates present on certain glycoforms of CD34, glycam-1, and MAdCAM-1 and with a low affinity to anionic oligosaccharide sequences related to sialylated Lewis X (sLex, CD15s) through its C-type lectin domain. CD62L is important for the homing of naïve lymphocytes to high endothelial venules in peripheral lymph nodes and Peyer's patches. It also plays a role in leukocyte rolling on activated endothelial cells. |
|---------------------------|--|
| Function :                | Calcium-dependent lectin that mediates cell adhesion by binding to glycoproteins on neighboring cells (PubMed:12403782, PubMed:28489325, PubMed:28011641).Mediates the adherence of lymphocytes to endothelial cells of high endothelial venules in peripheral lymph nodes. Promotes initial tethering and rolling of leukocytes in endothelia (PubMed:12403782, PubMed:28011641).   |
| Subcellular<br>Location : | Cell membrane ; Single-pass type I membrane protein .  |
| Expression :              | Expressed in B-cell lines and T-lymphocytes.   |
