

1 A K 1	protein
	on oten

Catalog No: YD0054

Reactivity: Human

**Applications:** WB;SDS-PAGE

Gene Name: JAK1

Protein Name: JAK1 protein

**Sequence:** Amino acid: 1-189, with his-MBP tag.

P23458

P52332

Human Gene ld: 3716

**Human Swiss Prot** 

No:

**Mouse Swiss Prot** 

No:

Formulation: Liquid in PBS

Source : E.coli

**Dilution :** WB 1:500-2000

**Concentration:** SDS-PAGE >90%

**Storage Stability:** -20°C/6 month,-80°C for long storage

**Background :** catalytic activity:ATP + a [protein]-L-tyrosine = ADP + a [protein]-L-tyrosine

phosphate.,domain:Possesses two phosphotransferase domains. The second one probably contains the catalytic domain (By similarity), while the presence of slight differences suggest a different role for domain 1.,domain:The FERM domain mediates interaction with JAKMIP1.,function:Tyrosine kinase of the non-receptor type, involved in the IFN-alpha/beta/gamma signal pathway. Kinase partner for the interleukin (IL)-2 receptor.,sequence caution:Translation N-terminally extended.,similarity:Belongs to the protein kinase superfamily. Tyr

protein kinase family. JAK subfamily., similarity: Contains 1 FERM

domain.,similarity:Contains 1 protein kinase domain.,similarity:Contains 1 SH2

domain., subcellular location: Wholly intracellular, possibly membrane

associated.,subunit:Interacts with IL31RA, JAKMIP1 and SHB.,tissue specificity:Expressed at higher levels in primary colon tumors than in normal colon tissue. The expression level in metastatic colon tumors is comparable to the expression level in normal colon tissue.,

## **Function:**

protein amino acid phosphorylation, phosphorus metabolic process, phosphate metabolic process, cell surface receptor linked signal transduction, enzyme linked receptor protein signaling pathway, intracellular signaling cascade, protein kinase cascade, phosphorylation, peptidyl-tyrosine phosphorylation, peptidyl-tyrosine modification, cytokine-mediated signaling pathway, response to antibiotic,

## Subcellular Location:

Endomembrane system; Peripheral membrane protein. Wholly intracellular, possibly membrane associated.

## **Expression:**

Expressed at higher levels in primary colon tumors than in normal colon tissue. The expression level in metastatic colon tumors is comparable to the expression level in normal colon tissue.
