

CSF1-FC recombinant protein

YD3052 Catalog No:

Reactivity: Human;

>90% as determined by SDS-PAGE **Purity:**

Gene Name: CSF1

Protein Name: Macrophage colony-stimulating factor 1 (CSF-1) (M-CSF) (MCSF) (Lanimostim)

(Proteoglycan macrophage colony-stimulating factor) (PG-M-CSF) [Cleaved into:

Processed macrophage colony-stimulating factor

Amino acid:32-496, with FC tag. Sequence:

P09603

Human Gene Id: 1435

Human Swiss Prot

No:

Formulation: Phosphate-buffered solution

Mammalian cells Source:

-15°C to -25°C/1 year(Avoid freeze / thaw cycles) **Storage Stability:**

Function: Cytokine that plays an essential role in the regulation of survival, proliferation

> and differentiation of hematopoietic precursor cells, especially mononuclear phagocytes, such as macrophages and monocytes. Promotes the release of proinflammatory chemokines, and thereby plays an important role in innate immunity and in inflammatory processes. Plays an important role in the regulation of osteoclast proliferation and differentiation, the regulation of bone resorption, and is required for normal bone development. Required for normal male and female

membrane ruffles, cell adhesion and cell migration. Plays a role in lipoprotein

fertility. Promotes reorganization of the actin cytoskeleton, regulates formation of

clearance.

Subcellular

Cell membrane; Single-pass type I membrane protein.; [Processed macrophage colony-stimulating factor 1]: Secreted, extracellular space. Location:

1/2
