

NeuN rabbit-FC recombinant protein

Catalog No: YD3100

Reactivity: Human;

Purity: >90% as determined by SDS-PAGE

Gene Name: NeuN

Protein Name: NeuN Neuronal Marker

Sequence: Amino acid:11-100,with rabbit FC tag.

A6NFN3

Human Gene Id: 146713

Human Swiss Prot

No:

Formulation: Phosphate-buffered solution

Source : Mammalian cells

Storage Stability: -15°C to -25°C/1 year(Avoid freeze / thaw cycles)

Background: This gene encodes a member of the RNA-binding FOX protein family which is

involved in the regulation of alternative splicing of pre-mRNA. The protein has an N-terminal proline-rich region, an RNA recognition motif (RRM) domain, and a C-terminal alanine-rich region. This gene produces the neuronal nuclei (NeuN) antigen that has been widely used as a marker for post-mitotic neurons. This gene has its highest expression in the central nervous system and plays a prominent role in neural tissue development and regulation of adult brain function.

Mutations in this gene have been associated with numerous neurological disorders. Alternative splicing of this gene results in multiple transcript variants

encoding distinct isoforms. [provided by RefSeg, May 2017]

Subcellular Location:

Cytoplasmic, Nuclear
