

TSHB Polyclonal Antibody

Catalog No: YN2217

Reactivity: Human;Rat;Mouse

Applications: WB;ELISA

Target: TSHB

Fields: >>cAMP signaling pathway;>>Neuroactive ligand-receptor

interaction;>>Thyroid hormone synthesis;>>Regulation of lipolysis in

adipocytes;>>Autoimmune thyroid disease

Gene Name: TSHB

Protein Name: Thyrotropin subunit beta (Thyroid-stimulating hormone subunit beta) (TSH-B)

(TSH-beta) (Thyrotropin beta chain) (Thyrotropin alfa)

Human Gene Id: 7252

Human Swiss Prot

No:

Mouse Swiss Prot

No:

Rat Swiss Prot No: P04652

Immunogen: Synthesized peptide derived from part region of human protein

Specificity: TSHB Polyclonal Antibody detects endogenous levels of protein.

Formulation : Liquid in PBS containing 50% glycerol, and 0.02% sodium azide.

Source: Polyclonal, Rabbit, IgG

Dilution: WB 1:500-2000 ELISA 1:5000-20000

P01222

P12656

Purification: The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

Concentration: 1 mg/ml

-15°C to -25°C/1 year(Do not lower than -25°C) Storage Stability:

Observed Band: 15kD

Neuroactive ligand-receptor interaction; Autoimmune thyroid disease; **Cell Pathway:**

Background:

The four human glycoprotein hormones chorionic gonadotropin (CG), luteinizing hormone (LH), follicle stimulating hormone (FSH), and thyroid stimulating hormone (TSH) are dimers consisting of alpha and beta subunits that are associated noncovalently. The alpha subunits of these hormones are identical, however, their beta chains are unique and confer biological specificity. Thyroid stimulating hormone functions in the control of thyroid structure and metabolism. The protein encoded by this gene is the beta subunit of thyroid stimulating hormone. Mutations in this gene are associated with congenital central and secondary hypothyroidism and Hashimoto's thyroiditis. Alternative splicing of this gene results in multiple transcript variants. [provided by RefSeq, May 2013].

Function: function:Indispensable for the control of thyroid structure and metabolism..online

> information: Clinical information on Thyrogen, online information: Thyroidstimulating hormone entry, pharmaceutical: Available under the name Thyrogen (Genzyme). Used in combination with other tests to detect recurring or leftover thyroid cancer cells in patients with a history of certain types of thyroid cancer., similarity: Belongs to the glycoprotein hormones subunit beta family., subunit: Heterodimer of a common alpha chain and a unique beta chain

which confers biological specificity to thyrotropin, lutropin, follitropin and

gonadotropin..

Subcellular Location:

Secreted.
