

AMID Polyclonal Antibody

Catalog No :	YT0210
Reactivity :	Human;Mouse;Monkey
Applications :	WB;IHC;IF;ELISA
Target :	AMID
Fields :	>>p53 signaling pathway
Gene Name :	AIFM2
Protein Name :	Apoptosis-inducing factor 2
Human Gene Id :	84883
Human Swiss Prot No :	Q9BRQ8
Mouse Gene Id :	71361
Mouse Swiss Prot No :	Q8BUE4
Immunogen :	The antiserum was produced against synthesized peptide derived from human AIFM2. AA range:141-190
Specificity :	AMID Polyclonal Antibody detects endogenous levels of AMID protein.
Formulation :	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source :	Polyclonal, Rabbit,IgG
Dilution :	WB 1:500 - 1:2000. IHC 1:100 - 1:300. IF 1:200 - 1:1000. ELISA: 1:40000. Not yet tested in other applications.
Purification :	The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.
Concentration :	1 mg/ml

Storage Stability : -15°C to -25°C/1 year(Do not lower than -25°C)

Observed Band : 41kD

Background : This gene encodes a flavoprotein oxidoreductase that binds single stranded DNA and is thought to contribute to apoptosis in the presence of bacterial and viral DNA. The expression of this gene is also found to be induced by tumor suppressor protein p53 in colon cancer cells. [provided by RefSeq, Nov 2010],

Function : cofactor:FAD. Binds 6-hydroxy-FAD non-covalently.,function:Oxidoreductase, which may play a role in mediating a TP53/p53-dependent apoptosis response. Probable oxidoreductase that acts as a caspase-independent mitochondrial effector of apoptotic cell death. Binds to DNA in a sequence-independent manner. May contribute to genotoxin-induced growth arrest.,induction:Expression detected at 4 hours after induction by TP53/p53. Down-regulated in a wide range of human tumors.,similarity:Belongs to the FAD-dependent oxidoreductase family.,tissue specificity:Detected in most normal tissues as two transcripts of 1.8 and 4.0 kb in length, respectively. Highly expressed in heart, moderately in liver and skeletal muscles, and expressed at low levels in placenta, lung, kidney, and pancreas. Both transcripts expressed following TP53/p53 induction. The shorter 1.8 kb transcript seems to be the major tra

Subcellular Location : Lipid droplet . Cell membrane ; Lipid-anchor . Cytoplasm . Mitochondrion membrane . Nucleus .

Expression : Detected in most normal tissues as two transcripts of 1.8 and 4.0 kb in length, respectively. Highly expressed in heart, moderately in liver and skeletal muscles, and expressed at low levels in placenta, lung, kidney, and pancreas. Both transcripts expressed following p53/TP53 induction. The shorter 1.8 kb transcript seems to be the major transcript in EB1 colon cancer cells.

Western Blot analysis of various cells using AMID Polyclonal Antibody

Immunohistochemical analysis of paraffin-embedded Human lung cancer. Antibody was diluted at 1:100(4° overnight). High-pressure and temperature Tris-EDTA,pH8.0 was used for antigen retrieval. Negetive contrl (right) obtained from antibody was pre-absorbed by immunogen peptide.

Western blot analysis of lysates from COS7 cells, using AIFM2 Antibody. The lane on the right is blocked with the synthesized peptide.
